

MOISTURE METER WASTE PAPER, PELLETS, WOODEN CHIPS

DS5-AL

Moisture meter with digital display for measuring moisture content in waste paper, pellets, wooden chips, etc.

- round sensor with sharp top \varnothing 10 mm x 420 mm
- material group adjustment via key pad
- adjusted material setting is always shown in the display
- calibration possible with the optional available test module PE50R
- calibration curves for different materials
- with aluminium bottom case part for a better protection against mechanical and electrostatical strength

In waste paper balls a hole must be drilled with an optional available snake drill

Optional PC-software for

- adjustment of measurement parameters
- generating of specific calibration curves, based on comparing measurements
- transferring of measured values for visualisation and documentation

Technical data:

measuring range:	0 - 100% (adjustable)
resolution:	0,1%
measuring depth:	approx. 5 cm round the top
measuring range:	1 - 10 measurements/ s (adjustable)
damping:	0 - 99% (adjustable)
storage:	250 values
dimensions meter::	approx. 200 x 80 x 40 mm
dimensions probe::	approx. \varnothing 10 mm x 420 mm
weight:	approx. 430 g
interface:	RS232 / DMI-Controller

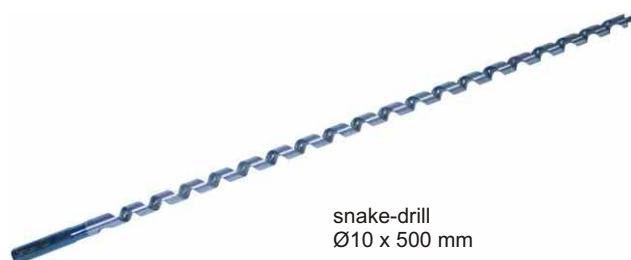

Optional extras:

lithium long life bat.
> 30 h measuring time

test module PE50R

snake-drill
 \varnothing 10 x 500 mm
