## Objectives:

- Prepare Project HSE Plan and ensure distribution of HSE procedures.
- Review and improve the Project HSE management system.
- Advise Management on preparation, promulgation and review of the CONTRACTOR & Project Safety Policy for Health, Safety and Environment, including the organization and arrangements for carrying out the Policy.
- Participate in risk assessments.
- Ensure that a system is organized in the event of an emergency for applying First Aid and that necessary emergency procedures have been established on the site.
- Assist in the coordination of emergency response situations.
- Supervise the activities of site HSE personnel.
- Ensure all accidents, incidents, and near misses are identified and investigated in conformance with COMPANY, Contractor, and local authority requirements. Carry out investigations of accidents in accordance with Project requirements.

- Conduct regular site HSE inspections. Provide an inspection report to the PM and CM and Inform all Management levels advising on how to deal with problems that affect Health, Safety & Environment.
- Promotes and develops an innovative and proactive safety culture within the organization.
- Ensures implementation and continuous improvement of safety and health processes and systems consistent with the organization's safety policies and performance standards as well as compliance with applicable regulations.
- Scheduling and conducting Project internal HSE audits on Contractors' activities.
- Coordination with Construction Engineers in different disciplines during the Construction phase for their tasks related to HSE activities.
- Strive for continuous improvement and incorporate "Leadership Program" concepts into safety programs (e.g., observation programs, use of leading indicators).
