**Risk Culture vs. Risk Bureaucracy**

**Martin Vilsøe**  
Partner at Implement Consulting Group

How do you build one and limit the other? The most common pitfall in ERM is the "risk reporting trap". ERM can often morph in to a bureaucratic and cumbersome process leading to limited impact in the organization. However, ERM can also be an avenue to empower the organization when making key decisions. During this session, we will explore some of the challenges and potential solutions that can inspire the evolution of our ERM programs.

**Recognition for Speakers**
