

VISITOR INFORMATION

Please make yourself familiar with our guidelines

- Please wear the correct PPE for the purpose of your visit
- Please don't come into the care home if you are feeling unwell, even if you have tested negative for COVID-19, are fully vaccinated and have received their booster. Transmissible viruses such as flu, respiratory syncytial virus (RSV) and norovirus can be just as dangerous to our residents as COVID-19.
- Please catch coughs and sneezes in tissues and sanitise hands afterwards.
- Comply with the infection prevention and control measures: mandatory hand hygiene (for at least 20 seconds) and the use of PPE.
- Additional requirements for face masks may be in place during a confirmed outbreak of COVID-19
- Where visiting is modified during an outbreak of COVID-19 or where a home resident has confirmed COVID-19, every resident will still be enabled to continue to receive one visitor inside the care home.

Thank you
