

Abbey's TIP 1

HOW TO CUT PERFECT DIAMONDS

Use Beattie's Ultimate Strip Guide to make diamonds of any size using a Custom Made Angle Guide (Angle Guide NOT included).

Press glass firmly with left hand up against pre-attached straight edge.

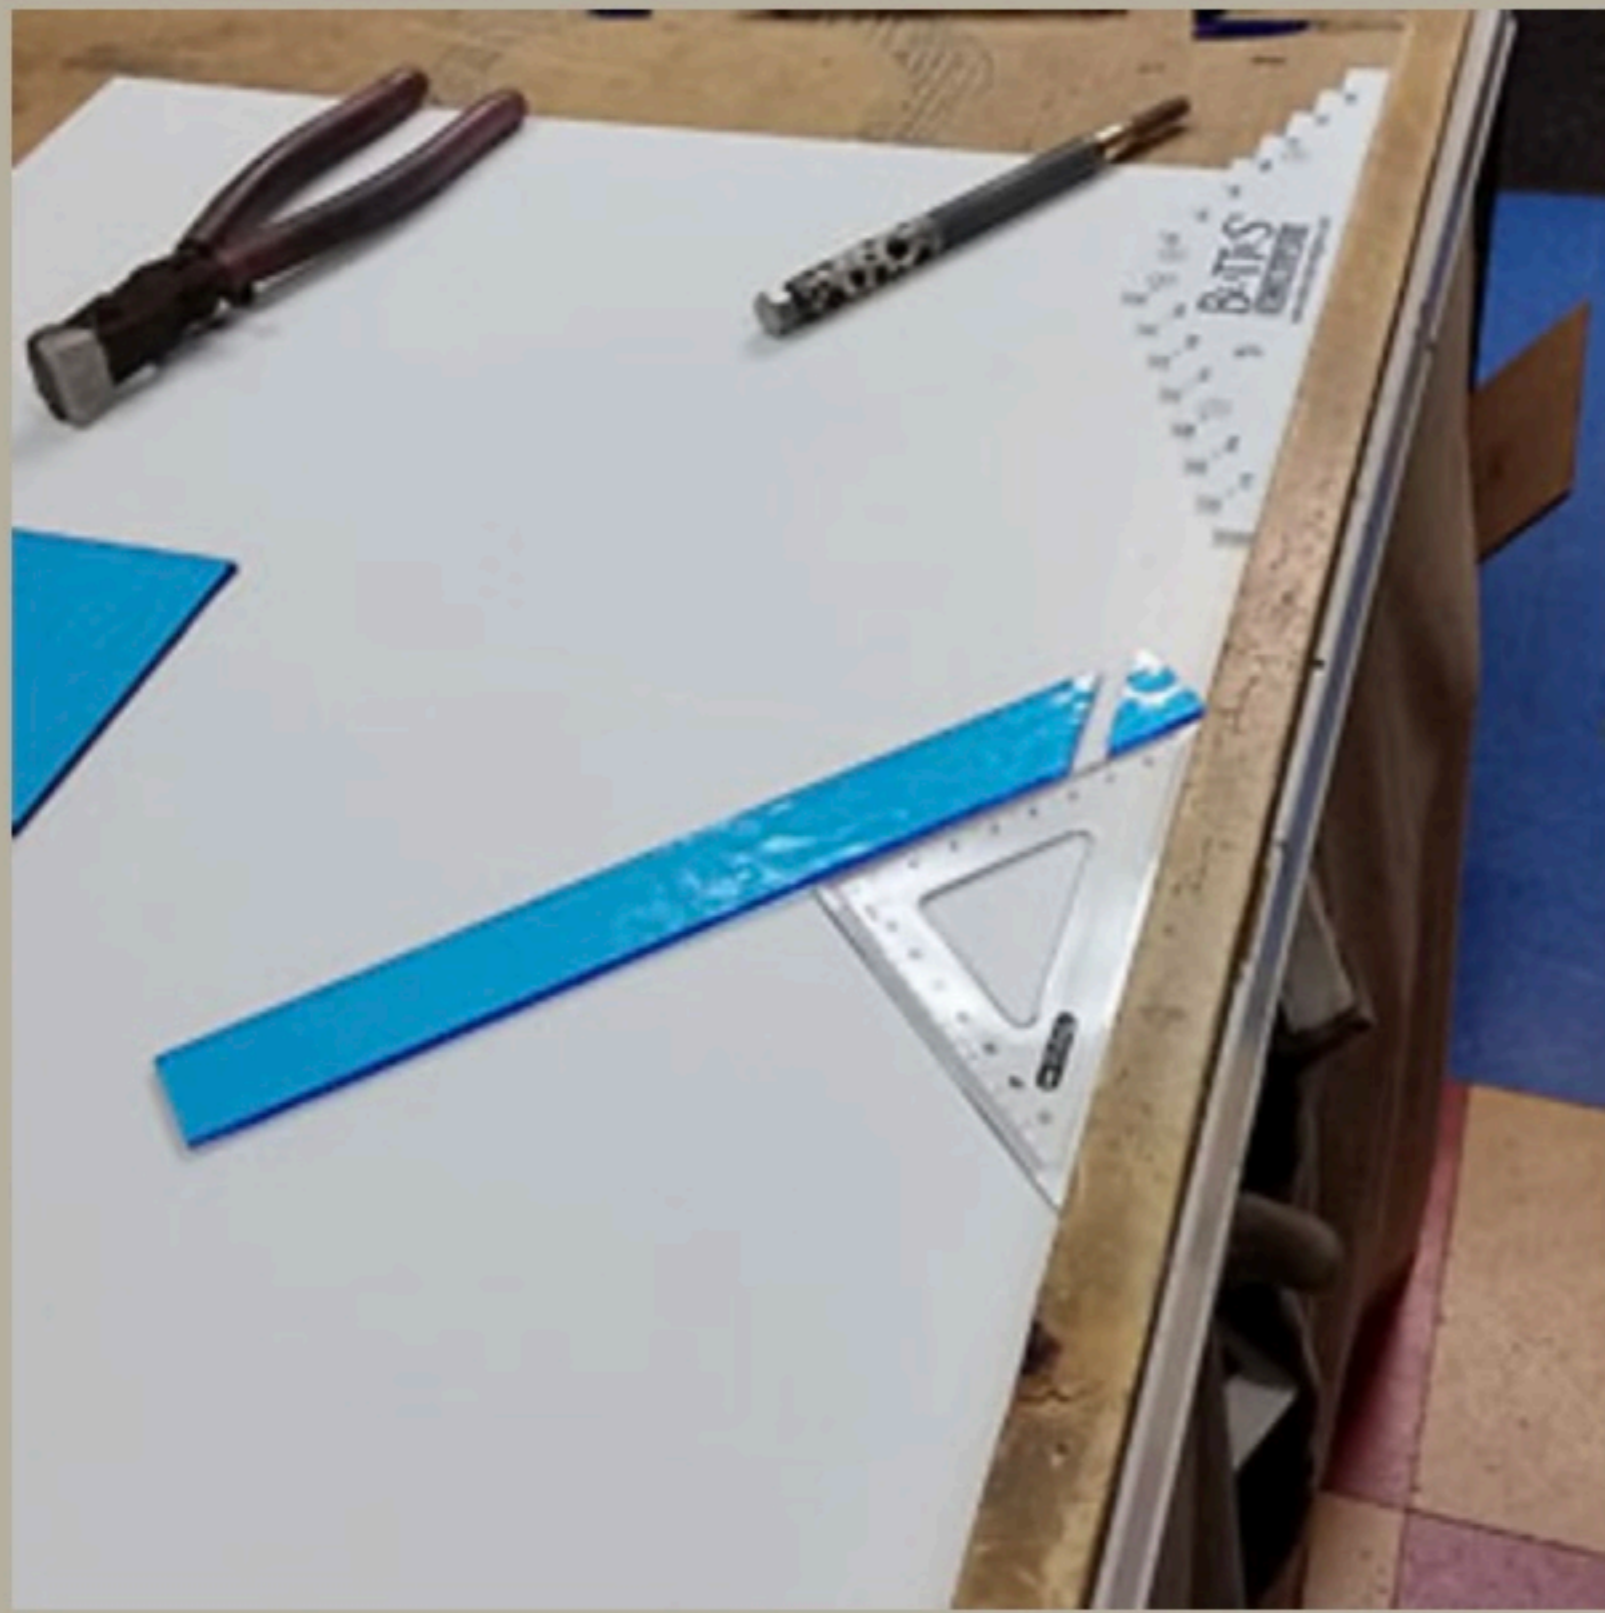

Place cutter firmly in appropriate measured slot (example 1" shown).

Run Ultimate Strip Guide and cutter along straight edge.

Snap off strip.

Place strip along an angle guide and use the strip guide to cut off 90 degree edge to make it appropriate angle for diamond. (You can use any slot on the strip guide for this purpose)

Snap off and dispose of this set up piece.

Place the strip against an angle guide again and use guide at same measure slot as the strip size you cut originally (example 1" shown).

Snap off and continue to cut as many perfect diamond shapes as you want.

Cut snap. Cut snap. Cut snap.

All will be perfectly identical. Amazing eh?

You can easily make a either a 6 or 8 piece star.
