Fain.C House 湖光茶館 Selects C.R.I.S.T.A.L.® Audiophile

Owned and run by 湖光教會 Neihu Huguang Church, Fain.C House serves as a children and teenager development centre in the Neihu District of Taipei City, with services ranging from child care, music lessons, tuition, counseling, to performing arts.

The facilities at Fain.C House consist of children playhouse, library for students, class rooms, music studios, cafe, and a performing hall with seating capacity of approximate 300 pax.

GECKO® C.R.I.S.T.A.L.® Audiophile technologies and equipments have been chosen for the performing hall sound system upgrade. The decision was made after having gone through a series of

selection and testing of systems of different makes, a necessary upgrade to resolve their long-time intelligibility (muffled sound), coverage, and howling issues [unusual Potential Acoustic Gain (PAG) versus Needed Acoustic Gain (NAG) issues], among others – for its stage and front-of-house (F.O.H.).

The system upgrade consists of:

- 2 units of GECKO® REVELATION SR 612RF 12" 2-way full-range C.R.I.S.T.A.L.® Audiophile long-throw speakers for F.O.H. (in replacement of multiple 12" speakers/18" subwoofers setup);
- 1 unit of GECKO® GENESIS ELEGANCE AGE 600H C.R.I.S.T.A.L.® Audiophile Class-H power amplifier. The GENESIS ELEGANCE series of amplifiers are world's first multi-stage Class-H C.R.I.S.T.A.L.® Audiophile power amplifiers with line-replaceable unit (LRU) design;
- 1 unit of GECKO® EXODUS ODYSSEY MXR 3604L 36-channel C.R.I.S.T.A.L.® Audiophile mixing console;
- 1 lot of GECKO® TRUTH T2 audiophile speaker cables;
- 1 lot of GECKO® TRUTH T3AL audiophile signal cables;
- 1 lot of GECKO® OLYMPIAN series audiophile connectors.

"With the new GECKO® C.R.I.S.T.A.L.® Audiophile system installed - clarity, intelligibility, balanced and equal volume coverage has been achieved while meeting OSHA safety standards for health (hearing)".
