GECKO Chosen for Wesley Methodist Church

console, and a unit of GECKO® EXODUS ATOM MXR 1208A powered mixing console, all with advanced C.R.I.S.T.A.L.® Audiophile technology. The 'minimalist concept' system upgrade was designed by Sam Tai, Technical Head of GECKO® Borneo, without treating the hall acoustics.

"Now with the GECKO® C.R.I.S.T.A.L.®

Wesley Methodist Church in Sarawak, continues to stand out as the only church in Sibu that conducts worship services in English. On the recent sound system upgrade, the 350 seating capacity sanctuary of Wesley Methodist Church has benefitted from very much improved speech intelligibility, ease of handling, enhanced visual aesthetics and expanded multimedia options, with installation of GECKO® audio system anchored by a pair of GECKO® REVELATION SR 615RF 15" speakers, a unit of GECKO® EXODUS ALPHA MXR 1800 mixing

Audiophile system in place, we have noticed a tremendous improvement on sound clarity and quality for both speech and music. The sound is very comfortable to the ears with

every details heard clearly and evenly all across the sanctuary even though with only one pair of speakers

driven by a low-powered active mixing console. The GECKO® AYERS ROCK DI boxes are impressive too! The entire system is very easy on our crews."
