Conservative Baptist Citong Church choose audio clarity, operational simplicity, and value by GECKO

Citong Township is a rural township in Yunlin County, Taiwan. This is where the recent-completed Conservative Baptist Citong Church 荊桐浸信宣道會 new building is at. The church took over the span of three-year to complete this project covering all possible aspects to better serve the communities of Citong.

For the audio system, the Conservative Baptist Citong Church chose GECKO® C.R.I.S.T.A.L.® system for its simplicity of operation, its long-term value for money, and its ability and versatility to deliver superb audio clarity for both live and streaming applications.

Only a pair of GECKO® REVELATION SR 606R 6.5" loudspeakers installed was enough to deliver a superbly high-quality sound and equal-volume sound coverage to the hall and stage.

At the heart of the system is the GECKO® EXODUS ATOM MXR 1208A active mixing console with Class-H C.R.I.S.T.A.L.® technology, and all connections are via GECKO® TRUTH cables and GECKO® audiophile-grade connectors.

This is another quality project by GECKO AUDIO TAIWAN.
