

SPECIFICATION | GYPSUM CEILING BOARD

GYPSUM BOARD – 9 / 9.5mm (Ceiling board: Jointing or Flush Plaster system)

This product is used for residential as well as commercial ceiling applications. 9mm Tapered Edge gypsum boards can be used with either steel branding system or screw-up galvanized grid system. An extra smooth finish can be created by applying a layer of Rhinolite**. Boards are available in various lengths from 2.400m up to 3.600m (300mm increments), all 1.200m wide with tapered edges (Figure 1). The tapered edge board is usually used for tape & joint system.
