

iCoDem - international Congress on Dementia

is a regionally oriented event that brings together renowned lecturers from all over Europe who deal with the issues of: aging, dementia and cognitive impairments in scientific research or in health and social institutions.

The topics are the current challenges faced by experts in their daily work and about achievements of that work, as well as the transfer and exchange of knowledge for the purpose of education or training of medical and therapeutic staff, which insists on the multidisciplinary of the event in both directions (lecturer-listener).

The goal of iCoDem is to empower workers in the health and care sector and to raise the awareness of the SE Europe societies as well as influence on developing and adjustment of policies that treat this area.

workshops in official and informal spaces

9 National teams + 1 International team will, together with you, offer solutions as answer on challenges

How to find staff?

How to respond to the demands of a growing group of users (dementia and gerontology)?

How to charge for the service I provide?

How to have a satisfied user?

How to reconcile the user's request for a cheaper and better service with the staff's request for higher wages and better working conditions with the owner's request for higher profitability!

OSMAN KUČUK

director of the CENTER FOR DEMENTIA

The Business Forum is a unique opportunity to bring together health and social care service providers from Central and SE Europe in one place and present the challenges they face in order to, together with: financial and insurance companies, real estate firms, policy makers and IT companies, try to find: self-sustaining, efficient and affordable solutions that will characterize the future of the care sector.
