AUTOMOTIVE MARKET

INDUSTRIAL AIR FILTRATION

AUTHORIZED DISTRIBUTOR OF

ER FILTER & BEARING (PTY) LTD

Overview

Few industries experience the ebb and flow of change like the automotive industry. From engineering and design trends to mandates in fuel economy and passenger safety, automobile manufacturers – along with their myriad suppliers – have learned to adapt to the dynamic climate to survive.

Operations that used to generate weld fumes from manual weld stations now generate twice the fumes with the addition of automated robotic welding cells. Factories that used to machine or mill a handful of essential parts now produce entire catalogs of components for automakers.

While transformation is good for the industry, the diversification of processes introduces a legion of new dust, fume and mist collection challenges for plant managers, fabricators, and environmental health and safety professionals.

For half a century, Donaldson has been working with leading manufacturers and suppliers to the automotive industry around the world. We understand the challenges in your processes. We recognize the need to maintain a clean, safe, and compliant work environment in order to attract and retain the best employees. We know how important reliable performance and a lower total cost of ownership are to your bottom line.

When it comes to effectively addressing your organization's dust, fume, and mist collection challenges, Donaldson's Consultative, Comprehensive, Connected approach helps ensure you get the ideal solution.

Your Donaldson team will work with you to fully understand your processes, systems, and mitigation needs. Drawing from an extensive portfolio of industry-leading equipment, the team will design the optimal system for your operation. With direct access to customer service, online replacement filter ordering, and automated collector monitoring, everything you need is just a click away.

This is how we think. This is how we work. This is how we bring more to your dust collection challenges than anyone else.

Products

Cartridge

Downflo® Evolution

The Donaldson Torit® Downflo® Evolution (DFE) cartridge dust collector is capable of reducing equipment size and the number of required filters by up to 40%.

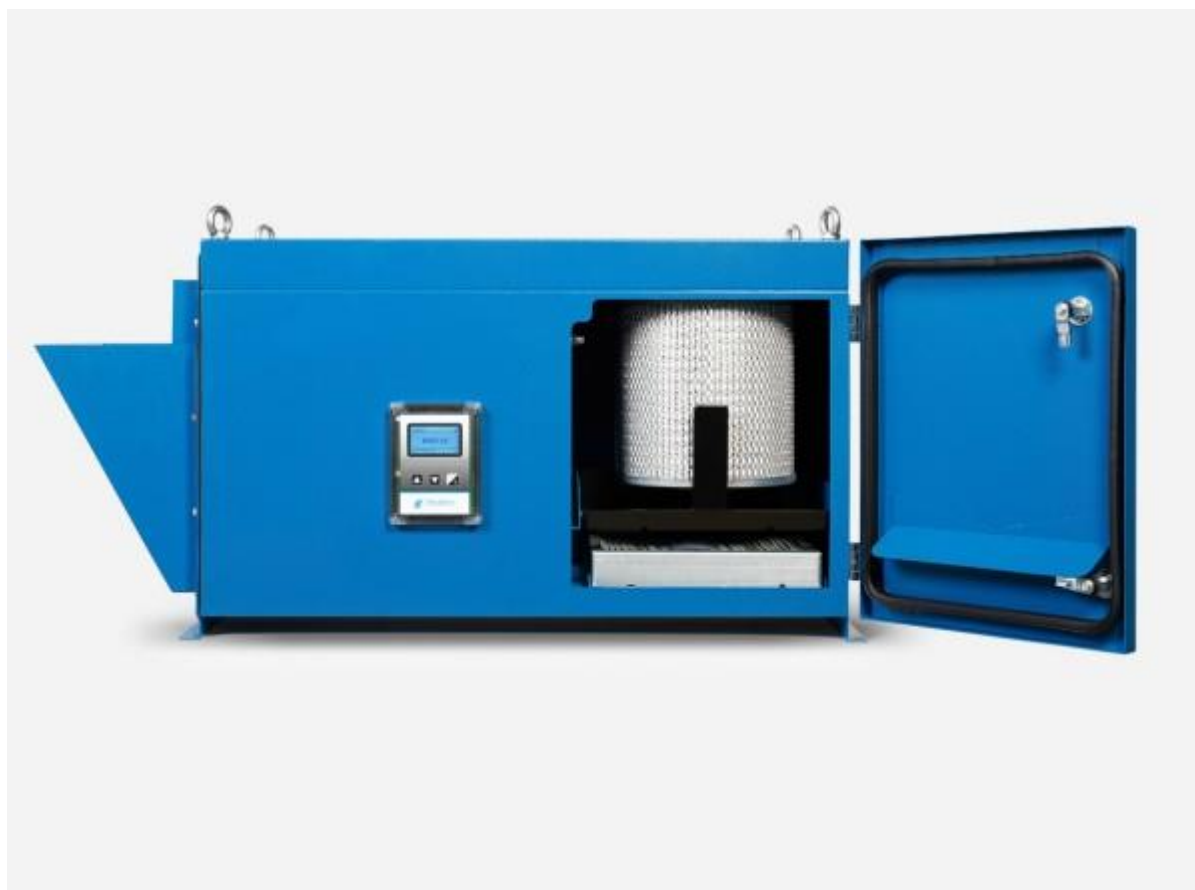

Downflo® WorkStation

Specifically designed for areas of dirty and/or noisy operations, the Donaldson Torit® Downflo® Workstation (DWS) applies no restrictions to worker movements or visibility.

Fume Collectors

Mist Collectors

WSOFlex

The WSOFlex provides a complete solution for water-soluble coolant, straight oil, and the most challenging, oily smoke – simply by changing the filter.

Applications

- Shot blasting
- Powder coating painting
- Foundry
- Laser cutting
- Plasma
- Welding
- Aluminum injection
- Plastic injection
- Machined
- Press and print
- Roughing of parts
