

ENVIRONMENTAL ENGINEER - M/F (FR-EN)**Offer reference 0022env-eng-mp****ONE SA IS RECRUITING IN CAMEROON**

The Environmental Engineer will play a crucial role in ensuring the project's compliance with environmental standards and regulations. This professional will be responsible for developing, implementing, and monitoring environmental strategies that minimize the project's impact on the environment while supporting the project's two-phase development plan.

Key Responsibilities :

- Develop and implement environmental strategies for the two-phase development plan of the Mbalam Project, aiming to reduce the environmental footprint.
- Ensure the project's compliance with local, state, federal laws, and regulations, as well as international environmental standards.
- Work closely with the mining and engineering teams to integrate environmental considerations into the project's operations.
- Conduct environmental assessments and audits, identify areas for improvement, and implement solutions.
- Oversee the environmental aspect of the ore extraction and transportation process. This includes minimizing the environmental impact of road and rail transport used in Phase 1 and Phase 2 respectively.
- Collaborate with environmental experts to design and implement measures to mitigate the environmental impact of mining operations. This includes careful planning around the removal of trees in the Mbalam deposit area.
- Monitor environmental performance, gather data, and report on environmental performance to internal and external stakeholders.
- Keep up-to-date with new environmental laws and regulations, and ensure the company's practices remain compliant.

Qualifications :

- Bachelor's degree in Environmental Engineering or a related field. A Master's degree or relevant certification would be an advantage.
- Excellent spoken and written French and English
- Proven experience in an Environmental Engineer role, ideally within the mining industry.
- Strong understanding of environmental laws and regulations, and best practices.
- Proficiency in environmental software systems.
- Excellent analytical and problem-solving skills.
- Exceptional communication skills to effectively liaise with internal teams and regulatory bodies.
- Ability to work under pressure, prioritizing and managing multiple tasks simultaneously to meet deadlines.

Personal Attributes :

- Detail-oriented and highly organized.
- Strong team player with the ability to lead and motivate a team.
- High level of integrity and dependability.
- Proactive in identifying issues and implementing solutions.
- Strong customer service mindset.
