## ELEKTA Urns Line - FSC® WOOD

### MADE IN ITALY

All models of the *ELEKTA Urns Line* are rigorously designed, handmade and packaged in Italy, through the selection of **exclusive raw materials** and **expert workforce from Italian craftsmanship**. A choice that guarantees the creation of luxury objects; reflection of a national identity known and appreciated all over the world, for the **accuracy of the manufacturing** and the **love for details**.

The *ELEKTA Urns Line* is based on finishes in poplar, linden, oak, wengè and basic rose **wood certified FSC (Forest Stewardship Council)**; label that indicates the use of wood from sustainably managed forests, according to strict environmental and socio-economic standards. Both the *DELUXE Models* and the *PREMIUM Models* use a particular wood texture that is obtained through a production process that peels the wood, dyes it by immersion in non-toxic colors and "reassembles" it. The **sophisticated "mirror" effect** of the urn is then obtained through an accurate lacquering process, which involves the application of a minimum of five layers of liquid varnish and numerous passages alternating between brushing and varnishing: the long time it takes us to finish each urn doesn't worry us, for us it is only the result that matters!

### DELUXE MODEL

- Versatile and luxurious urns. The interior of the *DELUXE* urns are lined in **soft Florentine velvet** by certified craftsmen, as well as being equipped with a **removable tray** for storing personal effects, the possibility of inserting a **sealable polished stainless steel core** to contain the ashes and a **Certificate of Guarantee and Authenticity**.
- Last, but not least, is the **patented self-contained slide closure method**, which lends that extra touch of elegance that is essential when handling high standard urns such of this.

### ACCESSORIES

*"This beautiful piece of art suits me perfectly."*

These are the words used by many people to describe their urn, chosen from our handcrafted lines. So why not to decide for ourselves for something that concerns us so closely?

We choose the style that best suits us, making it a **versatile and multipurpose urn**, adding the most suitable **tray** to contain our personal items, such as letters, jewels, cufflinks or watches (also covered in soft Florentine velvet to match the urn interior). So as to be today the place of conservation of our precious treasures, to then become our eternal guardian and witness tomorrow, continuing to be remembered, with emotion, by our loved ones, over time!

### PREMIUM MODEL

- The *PREMIUM* style is elegant and modern - simplicity at its best!
- A **well-calibrated chromatic combination** in the glossy lacquered wood finishes and the iconic cubic and rectangular shapes are the formula of their success.
- The interior is made of mahogany wood, and it can be come with a **sealable ashes bag**.
- This urn model closes with the classic method of **screwing the lid onto the bottom**, using 4 screws.
