A.21 Urns Line - STAINLESS STEEL

The urns in the *NATURA Collection* are made of **AISI 304 stainless steel**, both in cylindrical and rectangular prism shapes.

The ornamental motifs are engraved using the bas-relief technique, and then carefully polished.

In addition to being **protected with a special varnish**, the general surface is visually shaded, thanks to a particular technique, thus creating an **elegant contrast** able to further highlight the **brightness of the bas-relief**.

All the urns in the *A.21 Urns Line* are made with mainly manual processes, taking care of every detail, in order to offer you a product of the **highest quality** and **unalterable over time**.

The **interior** is also **made of stainless steel**, and can be equipped with a **sealable ashes bag**.

The *NATURA Collection* focuses on three ornamental motifs:

- ULIVO (OLIVE TREE) - an ancient tree, a symbol of permanence in life and peace;
- CILIEGIO (CHERRY TREE) - plant that represents peace and innocence, transit and rebirth;
- EDERA (IVY) - a faithful climber, synonymous with eternal friendship and memory.

All the models of the *A.21 Urns Line* **close by screwing the lid onto the bottom**, with the help of 3 screws for the cylindrical shape and 4 screws for the prism shape.

***CLEANING:** for proper maintenance of these urns must be used a **chamois leather** or **dry cloth**, such as the one supplied with the urn. **It is forbidden to use abrasive products** which can damage the surface coating.

**** The 2.5 Allen key is also supplied with the urn** to be able to easily open the lid on the urn bottom.

A.21 Urns Line - STAINLESS STEEL

URN MEASUREMENTS

RELIQUARY MEASUREMENTS

A.21 CYLINDER URN		A.21 CYLINDER RELIQUARY
