# PRO NEXUS SERIES

# THE HOTTEST SELECTION IS NOW HOTTER THAN EVER!

## WIN GREEN! PLAY SUPERSELECT!

The Pro Player rubbers meeting even the highest requirements. Due to the highly complex production process, these rubbers were only available to the GEWO top contract players until now! SuperSelect stands for carefully selected processing quality, constant playing features and characteristics, and lasting speed and spin ratings. A special gluing and production method ensures that our SuperSelect rubbers meet the high demands by professional players like Quadri Aruna (ranked top 15 in the world) and Alvaro Robles, runner-up world champion in men's double. Players who can handle the speed and excellent energy transfer will enjoy this new attacking weapon which leaves nothing to be desired. High-speed, spin-loaded attacking and counterattacking will come easy and almost without effort thanks to the two technology innovations Super Select Transmission Tec (SSTT) and Optimized Trajectory Tec (OTT) which form the basis of GEWO's new offensive masterpieces. GEWO's new ProPlayer level high-end rubber for players on their way to the top!

**OTT OPTIMIZED TRAJECTORY TEC.** The new GEWO Nexus SuperSelect rubbers are designed to meet even the highest requirements as regards acceleration and stability. Our goal was to develop a more compact sponge texture making the rubber more dynamic and elastic without increasing its weight. The new Optimized Trajectory Tec (OTT) is the innovative outcome of this development. More elastic air cells in the medium-pore sponge (SuperSelect Sponge Cells) provide for a flexible and dynamic feel despite the hardness and save weight at the same time. As a result, a higher density is reached in the sponge, which not only yields more spin and dynamics but also provides for a longer ball trajectory. Optimized Trajectory Tec (OTT) is **the key for state-of-the art, high-performance table tennis in combination with hard and dynamic sponges.**

**SST SUPER SELECT TRANSMISSION TEC.** Our brand-new Super Select Transmission Tec system (SSTT) **stands for optimum transfer of spin and speed onto the ball.** The new surface properties enable easy blocking and counterattacking of spin-loaded topspins with a flat ball trajectory avoiding unforced errors. Thanks to the special rubber mixture which guarantees a longer dwell time of the ball, your own topspin attacks still come easy and will present a tough challenge for many of your opponents.

**DGC40+ 2.0** stands for consistent, reliable coupling upon ball contact, and the grippy surface prevents "slipping" of the ball. The introduction of the latest ball generation (e.g. GEWO Select Pro 40+\*\*\*) called for a further development and adaptation of rubber top sheets resulting in the DGC40+ "Dynamic-Grip-Concept" 2.0. **The top sheet was specially developed for and adjusted to the requirements of the latest ball generations.** If you don't go forward, you go backwards!

**ELASTIC RUBBER** The EL rubber (Elastic Rubber), despite its compactness provides for great ball contact feedback and a unique feel. **All rubbers of this series are made for spin. The pimple heads in the rubber are arranged at a smaller distance from one another, and they are slightly thicker than in EL rubbers.** When it comes to generating spin, the DGC40+ 2.0 top sheet unfolds its true strength (highly reliable coupling and maximum spin), as it provides for a slightly larger contact area upon ball contact. Enjoy a new experience!

## GEWO Nexxus EL Pro 53 SuperSelect

OFF++

### Warning! High-performance zone – Ready to take the next step?

The ultimate choice for your offensive play. Maximum dynamics and speed ratings close to the feasible limit will help you play to your full potential. Workmanship and performance in Select quality. As the first GEWO rubber featuring the combination of our SSTT and OTT technologies, GEWO Nexxus EL Pro 53 SuperSelect is more elastic and flexible than you would expect considering the enormous hardness of its sponge. However, it still provides for ultimate speed, optimum ball contact and maximum spin. Ideal for close-to-the-table power play relying on short and explosive arm action.

- For attackers aiming at winning quick points using all modern, offensive stroke techniques.
- Maximum catapult, spin and ultimate speed for a rubber of the hard sponge segment.
- Uncompromising OFF power and dynamics for table tennis on Pro Player level.

Speed: 140 • Control: 77 • Spin: 127

Sponge hardness: EUR 51.9° – EUR 54.4° // JP 39.5° – 41.0° / maXXimum hard  
Thickness: 2.0 / maXXimum

Item no.: 10562

€ 62.90

## GEWO Nexxus EL Pro 48 SuperSelect

OFF+

### The smallest details make the difference – the ultimate solution for your play.

This SuperSelect variant is slightly more flexible and variable; it is the perfect choice for players looking for medium-hardness rubbers with maximum performance. The highly tacky top rubber sheet and the power-loaded sponge in combination with the special gluing technique guarantee maximum speed and spin ratings and still provide sufficient control for passive playing situations. Players feeling comfortable in mid-distance rallies in addition to close-to-the table situations will enjoy GEWO Nexxus EL Pro 48 SuperSelect and the clear, powerful sound it produces when you hit the ball perfectly.

- Ideal for spin-oriented players with good technique.
- Maximum catapult, spin and ultimate speed for a rubber of the medium-hard sponge segment.
- Powerplay from mid-distance and close to the table without loss of speed and control.

Speed: 134 • Control: 88 • Spin: 126

Sponge hardness: EUR 46.3° – 48.8° // JP 35.5° – 37.0° / medium hard  
Thickness: 2.0 / maXXimum

Item no.: 10563

€ 62.90

## GEWO Nexxus EL Pro 45 SuperSelect

OFF/OFF-

### Precision to its fullest with every stroke – the ultimate spin machine.

The medium variant of the Nexxus SuperSelect series not only offers high speed, catapult and excellent spin ratings but it is also great fun to play. Thanks to the combination of our SSTT and OTT technologies, the elastic sponge allows the ball to sink into the rubber thus increasing the dwell time of the ball and providing for excellent control at still high-speed ratings. A perfect symbiosis of performance, spin and control will give you the confidence you need to put your opponent under pressure with your variable top spin play.

- Ideal for variable attacking styles relying on topspin variants from any position.
- Maximum catapult, spin and ultimate speed for a rubber of the medium sponge segment.
- Spin-oriented all-round/off players making high demands on performance, sound and fun.

Speed: 128 • Control: 95 • Spin: 124

Sponge hardness: EUR 43.8° – 45.8° / JP 33.5° – 35.0° / medium  
Thickness: 2.0 / maXXimum

Item no.: 10564

€ 62.90

# DYNAMICS, PRECISION, INNOVATION

The success story continues! It all started in 2011 with Force ARC Off and the story is now continued with the new GEWO Force series. New compositions and materials were combined to meet the requirements of modern high-performance table tennis. The composition of the popular Force ARC Off remains unchanged while the blade's balance has been adapted to the demands made on state-of-the-art table tennis blades.

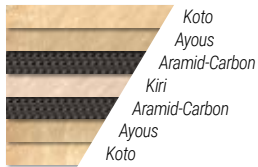

# FORCE

FORCE  
IMPULS  
40+

## COMPOSITION

### GEWO In-Force ARC OFF-

The GEWO In-Force ARC Off- is a true allrounder! Force ARC's "little brother" comes with the synthetic fibre placed directly on the core ply, which provides for a more flexible and "tame" feel. The harmonic composition of the blade offers new possibilities and variability for spin-oriented attackers, OFF/ALL players and even active players using pips-out/anti-spin rubbers.

Speed: 89 • Control: 94 • Weight: 84-87 g • Handle: FL, AN, ST  
Composition: Koto - Ayous - Aramid-Carbon - Kiri - Aramid-Carbon - Ayous - Koto

Item no.: 10670

€ 109.90

DESIGNED & DEVELOPED  
BY GERMAN ENGINEERS

## COMPOSITION

### GEWO In-Force PBO-PC OFF

In this blade, the GEWO material experts, by using PBO-PC fibre for the very first time in a GEWO blade, have succeeded in creating a unique combination of blade features. A blade composition combining stability, speed and feel to obtain a balanced, fairly soft feel, while providing more than enough power reserves for hard strokes. Too good to be true? Not with GEWO In-Force PBO-PC Off! The special gluing technique combined with the hardness of the new PBO-PC fibre provide for fantastic playing features as regards acceleration and control. A real novelty in the GEWO range of high-end blades. Thanks to the fine Limba outer plies, the blade also provides for longer ball contact and excellent spin ratings.

Speed: 100 • Control: 90 • Weight: 84-87 g • Handle: FL, AN, ST  
Composition: Limba - Limba - PBO-Power-Carbon - Ayous - PBO-Power-Carbon - Limba - Limba

### OFF-

### GEWO Force ARC OFF

On the occasion of its 10-years anniversary, the GEWO's best-selling blade, Force ARC Off, was given a new design. The general composition and feel were, of course, not changed; the balance of the blade, however, was adapted to the increasing weight of state-of-the-art high-performance rubbers. It combines high-tech materials, carbon and aramide (ARC), with high-end, well-seasoned wood veneers. The carbon fibre provides for high speed and stability, aramide guarantees excellent feel. Experience well-balance hardness and feel. Consistent features almost across the entire surface of the bat thanks to carefully chosen veneers. The stiffness of the blade yields ultimate stability and straightforward pressure in your play. Our Force ARC premium blade is the perfect choice for speed-oriented topspin players relying on their own attacking from the very first to the final rally. Feel the point-winning precision in all your strokes.

Speed: 97 • Control: 85 • Weight: 85 g • Handle: FL, AN, ST  
Composition: Koto - Aramid-Carbon - Ayous - Kiri - Ayous - Aramid-Carbon - Koto

## COMPOSITION

### OFF

### OFF

### GEWO Ex-Force PBO-PC OFF

When it comes to hardness, precision and feeling, our Ex-Force PBO-PC Off blade simply has no equal. Unlike in the In-Force variant, the synthetic fibre of Ex-Force PBO-PC Off is not placed on the core ply but on the fine Limba outer ply which makes this blade a true weapon of offence. Hard topspins and counter-spins come easy thanks to the new PBO-PC fibre, while the special gluing technique gives the whole blade composition all the control you need even if combined with hard rubbers. A perfect combination of spin, feeling and speed for variable, point-winning attacking. Be the dominator with GEWO Ex-Force PBO-PC Off!

Speed: 106 • Control: 82 • Weight: 83-86 g • Handle: FL, AN, ST  
Composition: Limba - PBO-Power-Carbon - Limba - Ayous - Limba - PBO-Power-Carbon - Limba

Item no.: 10672

€ 134.90

DESIGNED & DEVELOPED  
BY GERMAN ENGINEERS

## COMPOSITION

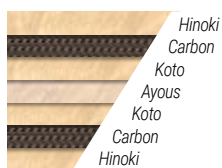

### OFF/OFF+

COMPOSITION

The new blade played by Alvaro Robles fine-tuned for peak performance. Based on the wishes and demands of Alvaro Robles, runner-up world champion in men's doubles (2019), we created a perfect blade composition supporting his sophisticated and spin-oriented playing style.

**GEWO Robles Hinoki Ex-Carbon OFF**

**OFF/OFF+**

The blade is based on the Aruna Hinoki Carbon Off model; however, in our GEWO Robles Hinoki Ex-Carbon Off, we placed the synthetic fibre layer under the top ply and not directly on the core ply. The challenge was to choose the right gluing technique to ensure that the blade is not too hard. This modification provides for a flexible feel but, thanks to the carbon fibre, still produces the power you need to compete on the highest level.

Speed: 102 • Control: 89 • Weight: 87–90 g • Handle: FL, AN, ST  
Composition: Hinoki, Carbon, Koto, Ayous, Koto, Carbon, Hinoki

## GEWO Thunderball²

The newly developed surface gives the ball highest rotation for top-spin and driving. The special sponge mediates a first class feeling. GEWO THUNDERBALL² guarantees best control and enables precise ball placement. You easily return opposing strokes, without problems you are taking the offensive yourself or are just safely holding the ball in the match. GEWO THUNDERBALL² the rubber with the super ball feeling. Controlled speed, maximum spin and high control for precise playing are the characteristics which offer unsuspected perspectives to every player.

Speed: 87 • Control: 109 • Spin: 100  
Thickness: 1,5 / 1,8 / 2,1 mm • Sponge hardness: medium

Item no.: 4814

€ 22.90

## GEWO Return Pro

Developed for the modern all-round plus player who wants controlled top-spin play. This rubber is extremely easy to handle in all situations, giving control and good feeling while still providing all-round/offensive speed. This rubber for mid-level players allows you to play every type of stroke. The soft, forgiving sponge reduces the catapult effect, so that all-round players can play with medium speed and strong spin while having utmost control. The sponge, combined with the very tacky surface, gives excellent feel even when playing slightly away from the table. The Return Pro comes with a very sensitive and elastic sponge.

Speed: 89 • Control: 99 • Spin: 102  
Thickness: 1,6 / 1,8 / 2,0 mm • Sponge hardness: medium

Item no.: 7219

€ 32.90

**Competition Series** The further development of the GEWO CS (Competition Series) took place in co-operation with the #teamGEWO stars Lev Katsman, Bence Majoros, Alvaro Robles and Quadri Aruna. Their experience, playful sensitivity in extreme game situations and the desire to develop the perfect racket were decisive in further improving the GEWO classics of the CS series.

## GEWO Indoor Duo

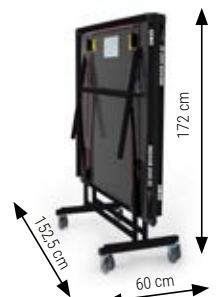

The 22 mm special GEWO playing surface (3tecWOOD premium) guarantees equal and fast ball bounce. The GEWO Table Indoor Duo 22 only requires minimal storage space of approx. 20 cm depth. The undercarriage is made of high-quality metal and is absolutely stable. Safety devices on each half of the table ensure the necessary safety during assembly and disassembly. Unevenness and different standing heights of up to 30 mm can be compensated for using the height adjuster on the rear legs.

The table is perfectly suited for school and hobby sports as well as a training table for clubs. Outstanding value for money. „Made in Germany“ quality! Rackets, balls and the net set are not included!

- indoor table, not weatherproof
- the perfect training table
- European standard: EN-Norm 14468-1
- net weight: 95.5 kg
- Playing position (in accordance with international dimensions):  
l=274 cm x w=152,5 cm x h=76 cm, storage position: l=152,5 cm x w=60 cm x h=172 cm

Colour: blue, green

Item no.: 10651 Price at local GEWO distributors

#### GEWO AWR Outdoor

Outdoor table, weatherproof; Net GEWO Perfekt II included. Accessories (rackets and balls) not included. Ideal for sports in schools and clubs, amateur players, youth centers, camping sites, etc. Technical specifications: Melamine resin board 6 mm, 4 double wheels (diameter 128 mm) with rubber tread, all wheels are manoeuvrable bat and ball holder on one side.

Balance of different standing positions and unevenness up to 30 mm through height adjustment on the outer legs. Playback-position possible (for solo training).

Item no.: 10315 Colour: grey  
Price at local GEWO distributors

## GEWO OUTDOOR TABLES

For sports in schools and clubs, amateur players, youth centers, camping sites, etc.

#### GEWO AWR Master Outdoor

To be used throughout the year, outdoor table (weatherproof). Best possible alternative to a table tennis table made of concrete. Perfect playing conditions through stable underconstruction. Metal net II: stationary net set, solid metal net made of galvanised sheet steel (thickness 4 mm), powder coated, consist two metal net holders and one metal net, length 160 cm, height 16 cm. Solid hold through anchoring on the standing area.

Dimensions playing position: l=274 cm x w=152,5 cm x h=76 cm. Net weight: 123 kg
