BLOSS

NATURAL ATTITUDE FOR
LUXURY GREENERY

GREEN INTERIOR

THE HARMONY OF GREENERY TO CREATE AN ORIGINAL ATMOSPHERE TO YOUR DECOR

Indeed, Bloss brings greenery into public, residential, and office environments by offering plant pots and containers designed specifically for indoor use. When used individually or grouped, they allow for the easy creation of green installations with conventional or hydroponic cultivation methods.

A wide range of solutions with new up-to-date finishes reflecting the latest design trends such as brass, copper, bronze, chrome or burnished surfaces.

Bloss quality and elegance are always exclusively Made in Italy. Choosing Bloss means being able to count on a system of unique products. They are inimitable in their design, the quality of their materials, and their innovative production processes.

Furthermore, thanks to their vast experience, their products are designed to be very practical so that plant care and maintenance is quick and easy without interrupting your regular duties.

The collection, along with the planters, includes a series of the latest accessories, and is designed to always meet the vital needs of your plants as well as accessorize with flexibility and elegance.

GREEN INTERIOR

ARMONIA DI FORME PER CREARE ORIGINALI ATMOSFERE DI VERDE NELL'INTERIOR DESIGN

Bloss porta il verde anche all'interno di ambienti pubblici, residenziali e uffici proponendo vasi e contenitori ideati per l'uso specifico indoor. Usati singolarmente o a gruppi permettono di creare facilmente installazioni green con coltura classica o idroponica.

Una gamma vastissima di soluzioni con nuove finiture in sintonia con le tendenze del design che prediligono le finiture pregiate come l'ottone, il rame, il bronzo e superficie cromate o bruite.

Qualità e eleganza Bloss sono il risultato di una produzione rigorosamente Made in Italy. Scegliere Bloss significa poter contare su un sistema di prodotti unici. Inimitabili per le caratteristiche progettuali, la qualità dei materiali, l'innovazione dei processi produttivi.

Inoltre, grazie all'esperienza acquisita, sono state pensate metodologie molto pratiche affinché la manutenzione e cura delle piante sia rapida e non disturbi le normali attività.

La collezione, che insieme alle fioriere prevede una serie di accessori in costante aggiornamento, è studiata per rispondere sempre al meglio alle necessità vitali delle piante e per arredare con flessibilità e eleganza.

STUDIES HAVE SHOWN THAT SIMPLY
ADDING SOME GREENERY IN THE FORM
OF INDOOR PLANTS CAN HAVE MAJOR
POSITIVE BENEFITS FOR EMPLOYEES
AND THEIR ORGANIZATIONS.

New University of Technology, Sydney

Numerous scientific studies have proven the positives of having more greenery in workspaces. Humans have an innate desire to be connected with nature, which scientists call 'biophilia'.

PLANTS HELP TO REDUCE STRESS

PLANTS HELP TO REDUCE SICKNESS

PLANTS CAN BOOST CREATIVITY

Plants help to increase productivity

Plants help to reduce noise levels

*Plants make workspaces
more attractive*

Plants clean the air

hy·dro·pon·ics / ,hīdrə' päniks/

Noun: the science of growing or the production of plants in nutrient-rich solutions or moist inert material, instead of in soil.

Latin: words “hydro” meaning water, and “ponos” meaning labor.

MAXI COLLECTION

A collection of elegant plant pot holders accessorize refined interiors, and are particularly targeted to the needs of the hotel industry. These unique pieces are designed with quality finishes and originality. They are perfect for creating large displays with great visual impact that often transform simple greenery into veritable sculptural objects.

The key concept of the Maxi collection is the raised element on which the container rests, which is designed to lend momentum and light. The raised structure enhances plants of any size, from the smallest to the most substantial. The greenery harmoniously merges with the planter to become its own design statement.

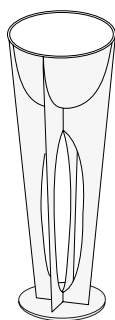

Una collezione di eleganti porta vasi per arredare interni di prestigio, con un occhio attento alle esigenze dell'hôtellerie. Pezzi unici per qualità di finitura e originalità, di grandi dimensioni e grande impatto visivo che di volta in volta si trasformano in veri e propri oggetti scultorei.

Concetto chiave della collezione Maxi è l'elemento di rialzo su cui poggia il contenitore, studiato per dare slancio e leggerezza. La struttura rialzata valorizza piante di qualunque dimensione, dalla più piccola alla più importante. Il verde compone un armonioso insieme con la fioriera e diventa esso stesso presenza di design.

GLOBE COLLECTION

The Globe series can be used on floors, mounted on walls, or ceilings. Some of the products even include practical and refined LED lights.

The wide product range has something for any decor, from rustic to more sophisticated environments. Containers are not only designed to hold flowers and plants, but to add life and emotion to the decor. The refined shapes, details, and elegant finishes create an exceptional aesthetic result yet are easy to maintain.

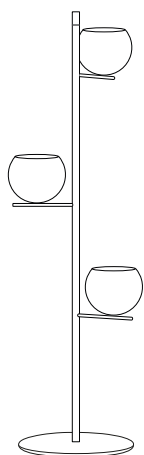

I prodotti della serie Globe possono essere utilizzati a pavimento, fissati a parete o al soffitto. Per alcuni è prevista l'integrazione di pratiche e raffinate luci led.

L'ampia gamma permette di utilizzarli in locali dal sapore più rustico come anche negli ambienti più sofisticati. Progettati per contenere fiori e piante, ma anche per emozionare. Forme e dettagli ricercati, finiture eleganti, ma al contempo di facile manutenzione per una resa estetica sempre d'eccellenza.

Streamlined elements that support large spherical plant pot holders. They can be used to embellish, delineate, or divide public or residential work areas. Finishes are very resistant for outdoor use, or elegant colors for indoor use which accentuate the versatile uses of this series.

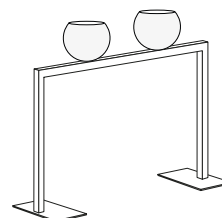

Flexibility is key in the Line series made entirely of aluminum therefore structurally very rigid. Two metal plates allow Line to become a stable "green wall divider" but to be moved as well as stowed very easily. A version with recessed LED lights is available, thus transforming the elements of the Line series into perfect outdoor lighting fixtures.

Elementi snelli che supportano capienti portavasi dalla forma sferica. Utilizzati per abbellire, perimetrare o dividere aree di lavoro, pubbliche o residenziali. Finiture resistenti per l'uso outdoor o eleganti cromie per l'uso indoor accentuano la versatilità di utilizzo di questa serie.

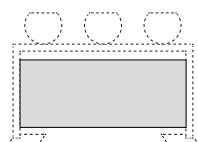

Flessibilità di utilizzo e rigidità strutturale sono le caratteristiche principali della serie Line realizzata completamente in alluminio. Le due basi metalliche la rendono una stabile "barriera fiorita" mantenendo agevoli lo spostamento e lo stivaggio. Disponibile la variante con le luci LED a incasso trasformando gli elementi della serie Line in corpi illuminanti perfetti per l'outdoor.

HYDROPONICS

Bloss has always devoted great attention to ecological awareness. For this reason, a collection of planters aimed at hydroponic cultivation method has been developed.

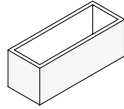

In fact, hydroponics offers numerous benefits to plants and the environment. Thanks to the reduced use of water and fertilizers, and the total absence of pesticides, hydroponics is the cultivation system of the future. Moreover, it enables plants to grow more vigorously and quickly than with traditional growing methods.

Bloss ha sempre avuto una grande attenzione per l'ecologia e per questo motivo ha scelto di sviluppare una collezione di fioriere dedicata alla coltivazione idroponica.

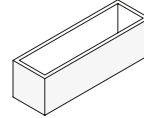

L'idroponica infatti offre numerosi benefici alle piante e all'ambiente. Grazie al ridotto utilizzo di acqua e fertilizzanti, all'assenza totale di pesticidi rappresenta il futuro delle coltivazioni. Le piante inoltre crescono molto più rigogliose e rapidamente rispetto alla coltura tradizionale.

GREEN QUALITY

Bloss design, functionality and beauty last forever. Quality that starts with stainless steel. Indestructible material, which remains unchanged over time and does not warp under hot or cold temperatures. And it is **100% recyclable**.

Stainless steel: the king of sustainable materials. Recyclable, clean and **durable**: what makes stainless steel one of the most sustainable materials in the world. Stainless steel withstands corrosion and is widely known as one of the most **durable** building materials ever. It is **completely recyclable** and can be reused several times in different applications.

Another material used by Bloss is aluminum.

Aluminum is easily recyclable by melting. Melting is fundamental because makes **100% recycling possible ad infinitum**, only requiring 5% of electricity for primary aluminum production.

Bloss makes a sustainable choice even when it comes to colors.

With low environmental impact, **powder coatings** used by Bloss do **not require ozone-depleting solvents and do not generate production waste**.

The application method used by Bloss also offers important advantages, as it allows powder coatings to be applied with a single layer process, with any excess powder collected and reused.

The result is long-lasting protection, which reduces the need for substitute products or coatings.

GREEN QUALITY

*Design, funzionalità e bellezza Bloss durano per sempre. Una qualità che inizia dall'acciaio inox. Un materiale indistruttibile, che resta inalterato nel tempo ed è indeformabile al caldo e freddo. Ed è **riciclabile al 100%**.*

Acciaio inox, il re dei materiali sostenibili. Riciclabile, igienico, duraturo: cosa rende l'acciaio inox uno dei materiali più sostenibili al mondo. Il termine "inox" sta per "inossidabile" poiché questa tipologia di acciaio è in grado di resistere alla corrosione. L'acciaio inox è noto a tutti per essere uno dei materiali da costruzione più **durevole** in assoluto. L'acciaio inox è **completamente riciclabile** quindi può essere riutilizzato più volte in differenti applicazioni.

Un altro materiale utilizzato da Bloss è l'alluminio.

L'alluminio è facilmente riciclabile per fusione. Questa pratica è fondamentale perché **riciclabile all'infinito, al 100%** e con l'utilizzo del solo 5% di energia elettrica necessaria per la produzione di quello primario.

Bloss fa una scelta sostenibile anche per i colori.

A basso impatto ambientale, le **vernici a polvere** usate da Bloss **non richiedono solventi dannosi per l'ozono e non generano scarti di produzione**.

Anche il metodo di applicazione utilizzato da Bloss offre dei vantaggi importanti, in quanto consente di applicare le vernici a polvere con un processo a strato singolo, mentre la polvere in eccesso può essere raccolta e riutilizzata. Il risultato è una protezione di lunga durata, che riduce la necessità di ricorrere a prodotti o rivestimenti sostitutivi.
