Page 1 of 12 Data Sheet Cisco Firepower Next-Generation Firewalls The Cisco Firepower® next-generation firewall (NGFW) is the industry's first fully integrated, threat-focused next-gen firewall with unified management. It uniquely provides advanced threat protection before, during, and after attacks. Stop more threats Contain known and unknown malware with leading Cisco® Advanced Malware Protection (AMP) and sandboxing. Gain more insight Gain superior visibility into your environment with Cisco Firepower next-gen IPS. Automated risk rankings and impact flags identify priorities for your team. Detect earlier, act faster The Cisco Annual Security Report identifies a 100-day median time from infection to detection, across enterprises. Reduce this time to less than a day. Reduce complexity Get unified management and automated threat correlation across tightly integrated security functions, including application firewalling, NGIPS, and AMP. Get more from your network Enhance security, and take advantage of your existing investments, with optional integration of other Cisco and third-party networking and security solutions. Performance Highlights Table 1 summarizes the performance highlights of the Cisco Firepower NGFW 4100 Series and 9300 Security Appliances and select Cisco ASA 5500-X appliances. Table 1.
