When learning for your Japanese Language Proficiency Test or JLPT, you need to purchase the correct textbooks to be able to train or learn efficiently. These books can be bought on many different online book sites, including Amazon. The 20 best textbooks for JLPT N3: JLPT N3 textbooks come in different series, made by different companies. There are four parts to the JLPT exam, and these are split into four sections: vocabulary, grammar, reading, and listening. When purchasing textbooks for JLPT, you will find that these books are bought for their specific purpose, for example, there is a textbook for vocabulary and another textbook for grammar, etc. There are, however, textbooks with all four skills included in one book. The 20 Best Textbooks for JLPT N3 Learning N3 learners need to have the correct textbooks for learning. It all depends on how a student learns, as to which textbook or series of textbooks he/she will purchase. Students need to be at an upper-intermediate level to be able to pass this level. The N3 level will enable the student to use the N3 exam marks to apply for work or school applications. This level is considered the upper-intermediate Japanese speaking level. 1. New Kanzen Master JLPT N3 Grammar Textbook: The New Kanzen Master JLPT N3 Grammar textbook has 159 pages and is written in Japanese and English. It enables the student to grasp Japanese grammar well. There are in-depth grammar explanations in this book. This book also improves sentence construction and explains how to use structures correctly in sentences. It also prepares the student for their N3 Grammar examination. This textbook does not only prepare the student for the JLPT N3 examination, but it gives the student a deeper understanding of the structure of the sentences. It also explains the small differences found in grammar sentences that look very similar. It also allows the learner to avoid making common mistakes. This book is divided up into five sections: Mondai Shokai is the introduction of the textbook. It provides information and tips on what type of questions are asked and how to solve these questions. Jitsuryoku Yoseihen is a section that provides similar sentence constructions, which are paired together. There are English explanations and sentences to help you understand these differences. Then there are questions where you choose the correct grammar structure. Jitsuryoku Yoseihen Part 2, is all about sentence structure and word positioning. There are sentences with four words missing, and the student has to provide the correct grammar structure to complete the sentences correctly. Jitsuryoku Yoseihen Part 3, this is a problem-solving section, where students will learn how to read and gather important information. There is also information about where to place verbs (they always come last in a sentence structure) and when not to use conjunctions. Mogi Shiken is the mock test section. It covers everything in the textbook and provides the same format as the actual examination. The New Kanzen Master JLPT N3 series is the most popular series, and 92% of all learners use this series as their main textbooks for learning. 2. The Mimi Mara Oboeru – New JLPT N3 textbook is a very good supplementary textbook, which can be added to the main series used. How Does One Prepare for the JLPT N3 Exams? The JLPT exam is organized by the Japanese Ministry of Education, and it is for foreign students who wish to become fluent in spoken Japanese. These students often want to attend a Japanese school or university, or they want to apply for a job in Japan. The Japanese Language Proficiency Test consists of 5 different levels. N5 is the beginner level, N4 teaches basic Japanese level, N3 is an upper-intermediate level, then we get N2 and N1 being the most advanced Japanese learning level. N3 is a much larger jump from N4 than from N5 to N4. JLPT N3 is an in-between level, and is a good level to get a position in any company in Japan or to be able to enter a university for study. For a student to pass the JLPT N3 exam, they must know about 650 kanji and 3750 vocabulary words. The best way to prepare the JLPT N3 is to purchase textbooks that you will learn from. These textbooks must suit your learning style. It is recommended that students use more than one set of textbooks to acquire all the vocabulary and kanji. The textbooks can be purchased on Amazon and other online educational book sites. It is interesting to know that if you are not satisfied with the book's contents, you can return the book to Amazon. Choosing the correct textbooks is very important, and each textbook has a different concept or way of teaching. They use different layouts and different teaching methods. It is purely one's way of learning as to what textbooks you would prefer. These textbooks are filled with illustrations and exercises to help you learn the Japanese language. Many textbooks come with CDs. These CDs provide listening exercises, as well as help the student with their pronunciation of words and sentences. Most N3 textbooks are divided up into 5 different books, vocabulary, kanji, comprehension, listening, reading, and grammar. However, some textbooks cover all five subjects in one textbook. The student needs to know their vocabulary and kanji to be able to pass their N3 exam. Reading sessions in N3 require a large amount of furigana, and a large amount of reading is expected. The student will find that the speed of the narrator, in the listening sections, will be increased, compared to N4. The student needs to have a good knowledge of the grammar patterns. At the end of each textbook, there is a 'mock' test, for you to complete. If you pass these mock tests, you should pass your JLPT N3 exam. Why is Learning with a Textbook so Important? Textbooks are still widely used in our society. They are still very important for the learning of a language. Textbooks today have beautiful illustrations, and the JLPT N3 books do not only have text in them, but they also have pictures and diagrams, which make the books interesting and easy to learn from. Textbooks also should be used as a foundation, along with other useful learning materials, or other supplementary textbooks. A textbook, which is made for a specific subject, would have all the needed exercises and reading material needed for the exam. Supplementary material can be added for extra scope on the topic and extra practice. Other methods used to learn for your JLTP N3 exam: Podcasts: Finding good Japanese podcasts can help you with your N3 exam preparation. The more we are exposed to hearing a language, the faster we will learn. Music: Listen to Japanese music and understanding the lyrics will improve your general understanding of the language. Audiobooks: Purchase audiobooks, which are a direct reading of a Japanese story. The student can practice pronunciation and reading using a storybook and an audiobook at the same time. Movies: There are many Japanese movies, which can be watched. One way to learn a language, and learn pronunciation, is to view other people conversing. It is helpful to watch movies that have English subtitles. This enables the English student to understand what has been said. Books: Reading other written material will increase your ability to read and understand a language. If there is a movie, which is made from an existing book, one could purchase both, and first, watch the movie and then read the book. This will help with the general understand of the language. Online teaching sites: There are numerous teaching sites, where you can find all types of affordable tuition to prepare you for your JLPT N3 exams. These sites are udemy (link), italki, cambly, and teachable. These sites either provide online courses, presentations and learner videos, or online teaching with a Japanese teacher. Advantages and Disadvantages of Using a Textbook Advantages Textbooks are usually used as a foundation when learning a subject. They are very useful to the teacher and the student because they have all the important methods, instructions, and answers, which are needed when learning the subject. Textbooks that are made for a specific exam, usually cover the exam topic thoroughly. They also have important exercises, which the student will need to complete to able to pass the examination. New language textbooks are made differently from previous additions. Teachers have formulated these books to keep the student's interest. They usually have interesting illustrations and phrases set out in such a way that the student does not lose interest. Chapters are set out well so that the student does not find the material tedious. Disadvantages Some textbooks do not cover all the work, which could be asked in an examination. Old textbooks consist mainly of writing with little or no illustrations, which could make learning tedious. Old textbooks may not cover the correct amount of work, as these exams usually change over time. So it is important to select textbooks, which are up to date. Textbooks are old fashioned and are no longer used as the main source for education. Some students find reading difficult and may become bored with the learning material. If a student purchases a textbook, which does not suit their learning style, they will not benefit as well. One cannot always view these books before purchasing them. Time to Study! Once you've picked the best textbooks for you, it's time to carve out plenty of time to study. But, with these best textbooks for the JLPT N3, you will be fully prepared to pass this difficult test.
