Blast furnace guide osrs gold

The blast furnace is an awesome members-only mini-game that takes place in Keldagrim for smelting bars. For more Smithing methods, see our 1-99 Smithing guide. One of the many cool features of this minigame is that you only use HALF of the amount of coal you'd normally use at a regular furnace. This means much bigger profit margins, more bars per hour and of course saving a lot of money spent along the way. Who doesn't like that?! This mini-game is used widely across Oldschool Runescape as a low requirement money-maker, or even other ways for some of the fastest smithing experience in the game. The Blast Furnace is ran by 5 dwarves who will let you use their furnace for some small payments. Blast Furnace Requirements In order to get all the juicy rewards of this minigame, you'll need to have some requirements. You must start The Giant Dwarf quest in order to access Keldagrim. You need at least 60 smithing without boosts, or pay small fee of 2,500 coins to the Blast Furnace Foreman to smelt bars for 10 minutes. An abundance of GP before starting, you will use around 80,000 coins per hour at the Blast Furnace. Recommended Items Ring of Charos (a) – This ring will reduce your entrance fee, please note however that if you use the 'pay' option on the Foreman, it will not give you a discount. You MUST go through the dialogue. You must be wearing the ring to get the discount. This ring is given to you after the completion of The Creature of Fenkenstrain quest, and it is activated (a) during the Garden of Tranquility quest. Ice Gloves – Wearing these gloves at the bar dispenser after you use the conveyor built will instantly cool them off and allow you to pick them up. Otherwise, you'll have to use a bucket of water to cool them off before gathering. The gloves save an inventory slot, and an extra step filling the bucket at the nearby sink each time. They are obtained in part of the Heroes' Quest. Official Blast Furnace Worlds This minigame has five available worlds: 352, 355, 358, 386 and 387. How to Get to the Blast Furnace This minigame is located in the east mines of Rellekka, near the cave entrance you will see the dwarven boatman. If you haven't started The Giant Dwarf quest, you can do so now by speaking with the boatman to get access to Keldagrim. I've provided a picture below of a route from Camelot to the boatman. Once you've made it into Keldagrim for the first time, head north and go across the bridge. A little further south you'll see the building with the blast furnace icon. Go inside this building and go down the stairs to find the Blast Furnace. It's much easier the next time around to access Keldagrim. You can use the Grand Exchange shortcut on the north-west wall, the minecart in the dwarven mines under ice mountain or alternatively you can the minigame group finder to teleport directly outside of the Blast Furnace building. How to Use the Blast Furnace After you get the hang of it, this minigame is a breeze. The minigame works by depositing your ore into the conveyor belt, running down the ramp, cooling off your smelted bars with either a bucket of water or the ice gloves, and then banking. Rinse and repeat. It is recommended to wear weight-reducing gear as you will be running most of the time. Recommended Inventory Setups For players above level 60 Smithing, it is recommended to wear your ice gloves with as much weight-reducing gear as you have. Have a coal bag (which holds up to 27 pieces of coal), a stamina potion and 25 ore. Note that if you're using ice gloves you can replace your bucket of water with ore. For players below level 60 Smithing, you must pay your fee every 10 minutes, a stamina potion, and 25 ore. Same as above, if you're using ice gloves you can replace your bucket of water with one more ore. Gold Bars Method When using gold bars at the Blast Furnace, you will see upwards of 320-340K experience per hour, which I'm sure you already know is absolutely insane. Goldsmith gauntlets make this possible because of their nearly 2.5 times experience boost, making this method even better and easily one of the best Smithing experience methods in the game. You need a Smithing level of 40 to use gold ore on a furnace. Goldsmith Gauntlets are one of the three glove rewards from the Family Crest quest. Experience Per Hour With the Blast Furnace being one of the best methods for Smithing experience in Oldschool Runescape, you can use the minigame for getting quite a bit of hourly profit gains or you can take the other route and use it solely for experience. Both of which in the end turn out a profit. Provided you are using Ice Gloves and have a coal bag equipped. I went ahead and put together a list of experience rates below. Bronze bars – 16-19K EXP per hour Iron bars – 70-75K EXP per hour Steel bars – 90-95K EXP per hour Silver bars – 75-90K EXP per hour Gold bars (with goldsmith gauntlets) – 320-340K EXP per hour Gold bars (without goldsmith gauntlets) – 125-130K EXP per hour Mithril bars – 99-105K EXP per hour Adamantite bars – 90-100K EXP per hour Runite bars – 92-105K EXP per hour Profit Per Hour Now that we've got experience rates out of the way, let's get into the money. Below I've created a list of approximate profit per hour at the Blast Furnace. Iron bars – ~103-105K per hour Steel bars – ~930K per hour Mithril bars – ~620K per hour Adamantite bars – ~1.4M per hour Runite bars – ~1.8M per hour The prices calculated above assume you're using your coal bag, ice gloves and the 72,000 coins per hour you'll pay to use the Blast Furnace. The Blast Furnace is a members-only minigame situated in Keldagrim for smelting bars. The furnace here only requires half as much coal when smelting usually, so it can be useful when smelting the ores that require more coal. There are 15 Blast Furnace worlds on Old School RuneScape, all of which make solving the Blast Furnace easy as there are five different dwarves - Dumpty, Stumpy, Pumpu, Numpy, and Thumpy - operating the mechanics of the Blast Furnace, so the player only has to focus on running the ores to the conveyor belt. Requirements[edit | edit source] Start The Giant Dwarf to gain access to Keldagrim. Smithing level 60 (cannot be boosted) or a 2500-coin fee to smelt bars with the furnace for 10 minutes. Equipping the ring of charos (a) will reduce the entrance fee to 1250 coins, if you go through the Blast Furnace Foreman's dialogue (1*3*2*3). Ice gloves or bucket of water (optional), used at the bar dispenser to cool the heated bars as they come out. An empty bucket spawn and water source can be found nearby. You can also wait for the bars to cool before taking them out. On Blast Furnace themed worlds, there is an additional 72k gp/hr fee to use the Blast Furnace; players can either place coins in the coffer near the bank chest, or pay the Blast Furnace Foreman directly. On all other worlds, there is no extra fee but players must work together to operate the Blast Furnace. Travelling and getting to the Blast Furnace[edit | edit source] From Seers' Village and Camelot, follow this path. The Blast Furnace is located in Keldagrim. To enter Keldagrim, the player must have started the quest The Giant Dwarf by speaking to the Dwarven Boatman within the mines east of Rellekka. The map on the left shows a path the player can take walking from Seers' Village/Camelot to the mines east of Rellekka. Once the player has visited Keldagrim at least once, they can return via mine cart from the Dwarven Mines under Ice Mountain or the Grand Exchange, or use the Minigame Group Finder to teleport right outside the Blast Furnace building. Suggested materials/inventory setups[edit | edit source] A map of the Blast Furnace room itself. Note: Remember to deposit coal first if not working with pure iron or gold! It is highly recommended to wear weight-reducing clothing to save run energy while moving heavy ore and smelted bars (Note: the Spottier cape and the Boots of lightness will reduce your weight by an additional 1kg over the Graceful cape and Graceful boots). Coins can also be used to pay the Blast Furnace Foreman for more time or to purchase ore there from Ordan. A coal bag is recommended if using an ore that requires coal. For maximum efficiency, stamina potion should be used. A ring of endurance may also prove helpful. If you have less than 60 smithing, you will need to pay a fee every 10 minutes. The suggested inventory is a bucket of water, a coal bag (if needed), and 26 ore. When using ice gloves, replace the bucket of water with an ore. Withdraw stamina potions and gold as needed depending your level. Full Smithing experience is gained from smelting the bars. There is also an anvil nearby to smith your bars, which the foreman will let you use if you have level 60 Smithing. At the Blast Furnace, the following Smithing XP can be gained producing bars. Moreover, the following assumes that the player has a coal bag in their inventory and are wearing ice gloves, thus there are 27 inventory slots occupied by ore. For better rates, use the Barbarian Vial Smash perk unlocked near Barbarian Outpost when sipping energy restores, ideally stamina potions. Bar Smithing Default Coal bag Lvl XP Bars/HR XP/HR Bars/HR XP/HR Bronze 1 6.2 2900–3400 18.0k–20.1k No change Iron 15 12.5 5800–6850 72.5k–85.6k No change Silver 20 13.6 5800–6850 78.9k–93.2k No change Steel 30 17.5 2900–3400 50.8k–59.5k 4650–5450 81.4k–95.4k Gold 40 22.5 5800–6850 130.5k–154.1k No change Gold (Gauntlets) 40 56.2 5600–6600 314.7k–370.9k No change Gold (Smithing cape) 99 56.2 5800–6850 326.0k–385.0k[1] No change Mithril 50 30 1900–2250 57.0k–67.5k 3150–3700 94.5k–111.0k Adamantite 70 37.5 1450–1700 54.4k–63.8k 2400–2800 90.0k–105.0k Runite 85 50 1150–1350 57.5k–67.5k 1900–2250 95.0k–112.5k † At "tick-perfect" rates, players can achieve upwards of 420,000 experience per hour. Money making guides[edit | edit source] The Blast Furnace provides a great opportunity for players to reap great profits by producing a large volume of bars. Note: The table below has already taken into account the 72k per hour for using a designated blast furnace world. These numbers assume the use of a coal bag, ice gloves, and 36 doses of stamina potions per hour. Always check current selling prices, as these numbers can change frequently. Level Money making guides Profit Bars/Hour XP/Hour 15 Smelting iron bars 373,761 6000 75,000 30 Smelting steel bars 627,361 5400 94,500 50 Smelting mithril bars 762,561 3600 108,000 70 Smelting adamantite bars 1,248,561 2700 101,250 85 Smelting runite bars 1,590,561 2150 107,500 Collecting raw materials[edit | edit source] Raw materials can be obtained in two ways: A player can have ore in their bank, and use the bank chest conveniently located in the Blast Furnace itself. Buy ore from Ordan who runs the Ore Seller shop (up to mithril). Ordan usually sells ore for cheaper than GE price while his stock is 50 or above, so many players choose to supplement their supply of banked ores by buying ore from Ordan when his stock is high. Therefore, on a busy world, Ordan's stock will often be at less than the max of 100 (which is especially true with coal). Operating the Blast Furnace[edit | edit source] This article or section requires a cleanup in order to meet the Old School RuneScape Wiki's quality standards.Reason: ToneYou can edit this page to improve it. IMPORTANT: All of the other tasks described by the Foreman are done for you by the dwarves running the Blast Furnace on the designated Blast Furnace worlds. For this service, it costs 72,000 coins per hour, but is highly recommended for speed of training. The process for operating the Blast Furnace is as follows: Place coal and/or ore on the Conveyor Belt. Cool down smelted bars with a bucket of water or just collect the bars with the ice gloves equipped. Collect the bars from the bar dispenser. Repeat. Notes Always keep your coal bag full. The max amount of coal which may be placed in the Blast Furnace is 254. Thus, typically the most preferred production method is to first stock coal to 254 before adding primary ores such as Mithril, Adamantite, and Runite ore. The max amount of primary ores such as Mithril, Adamantite, Runite and Gold which you can place is 28. If you try to place more than 28 primary ores without collecting the 28 bars in the dispenser, you will get an error that says "You should collect your bars before making any more." If you notice you're only getting 56 or 57 xp when smelting gold bars instead of 1517 or 1518, you might have forgotten to collect your 27 gold bars. There appears to be an in-game bug that lets you deposit up to 28 more gold ores after having placed 27. Doing this will give you the 56.2 xp for smelting gold bars with the goldsmith gauntlets until you've reached the 28 waiting to be collected, and then you will get 22.5 * the amount of extra gold bars when you collect them. This will show that you have only 28 gold bars to be collected, but there might be up to 55 gold bars to be collected. If for whatever reason you log out or disconnect while ores are on the conveyor belt, those ores will be lost. Ordan the Ore Seller[edit | edit source] Main articles: Ordan and Ore Seller The Ore Seller, run by Ordan, is one of many of the stores in Keldagrim and can be found downstairs in the Blast Furnace factory in the eastern side of Keldagrim. This shop stocks ore used for Smithing. The shop is restocked by dwarves that regularly enter the room and deliver a number (around 30) of one type of ore to the shop, rather than restocking 1 of every ore periodically. When the shop reaches 100 of a particular ore type the extra are "sent to storage". Stock[edit | edit source] Possible methods[edit | edit source] Note: There is a maximum of 254 coal and 56 primary (or 28 adamantite) ore in the furnace. High-level ores[edit | edit source] All high-level ore, such as adamantite and runite, must be in the player's bank as they cannot be bought from Ordan. Coal can be bought from Ordan, but the quantities required for high-level ore usually exhaust his stock after only making one inventory of bars. Therefore, it is recommended that players only use Ordan as a supplemental source and have most or all of the required coal in their bank. An example of mithril-processing using the shop[edit | edit source] Ordan sells all types of ore up to mithril, which allows a player to train Smithing without mining ores. The process for smelting mithril bars is as follows: Purchase mithril and coal from Ordan in the ratio two coal per one mithril. Make two trips of 27 coal (or one trip if using a coal bag with a loaded inventory). Operate the Blast Furnace to obtain 27 mithril bars as described thoroughly in the section Operating the Blast Furnace. Smith the bars into items and bank them or bank the bars directly using the Blast Furnace bank chest. One can repeat this until the shop runs out of ores. The coal supply generally runs out first; hence, players may need to switch to another world or supplement the store coal supply with banked coal. Bar Patterns[edit | edit source] Each bar has an optimal pattern to minimise the amount of running to the bank. Following these patterns you should never have to run back to the bank with ores, and never have to make a trip just to pick up bars. These patterns assume you have a coal bag. It is also easier to keep an extra 27 coal in the furnace too so there is less delay for your bars to be ready. Level Bar Trip 1 Trip 2 Trip 3 Trip 4 Trip 5 30 Steel bars 27 Coal, 27 Iron, Collect 50 Mithril bars 54 Coal 27 Coal, 27 Mithril, Collect 27 Coal, 27 Mithril, Collect 70 Adamantite bars 54 Coal 27 Coal, 27 Adamantite, Collect 85 Runite bars 54 Coal 54 Coal 54 Coal 27 Coal, 27 Runite, Collect 27 Coal, 27 Runite, Collect Gold + Mithril/Adamantite/Runite Training[edit | edit source] With the coal sack making gold and one of the more valuable bars at the same time can be done in conjunction as a more efficient method for xp and gold generation. An inventory will consist of the coal sack, goldsmith gauntlets, ice gloves, and either 26 gold ore or 26 mithril/adamantite/runite ore. Because every load of gold ore also adds 26 coal to the furnace it results in a hybrid method that produces more gp and xp than otherwise. Gold Only Mithril Only Gold/Mithril Adamantite Only Gold/Adamantite Runite Only Gold/Runite Average XP/Trip 1573.6 540 1120.6 506.25 12299.13 540 1420.9 Average GP/Trip -2,184 4,374 2,145 6,804 3,016 8,553 6 3,627 As an example, doing 1,000 trips of gold/adamantite would result in 1,299,130 xp and 3,016,000, while 500 trips of gold followed by 500 trips of just adamantite would result in 1,039,925 xp and 2,310,000 Changes[edit | edit source] Gallery[edit | edit source] The historical bar stock; replaced with Make-X Trivia[edit | edit source] Contrary to popular belief, the temperature of the stove does not affect the chance of a pipe becoming broken. The conveyor belt that moves the ores into the furnace has three separate sections turning independently. However, only the outer two are connected to the pedal mechanism; the inner one turns by itself. In the Q&A on 11 February 2010, Paul Gower stated that the Blast Furnace was created during an attempt to make a Smithing Guild. Originally, the Blast Furnace did not have dwarves working on the machines. They were added due to player complaints of saboteurs breaking the machines constantly. Oddly, the bar dispenser doesn't work while a dialogue box is open.
