Teens who drink have a higher risk of being involved in accidents, violent crimes, and the spread of STDs because of the physiological and psychological effects of alcohol, such as impaired judgment and slow reflexes. 3 answ 8. Terry's decision to take antihistamine and alcohol is not a safe behavior, because alcohol has sedative effects that would contribute and intensify the drowsiness effect of the antihistamines. 2 answ 9. Chronic and excessive drinking can affect the brain by decreasing the size of the hippocampus, inhibiting and mimicking the effects of the neurotransmitters in the brain, and developing vitamin deficiency that affects the brain's function. 2 answ 10. Dana has a drinking problem because he experiences alcohol-related blackouts causing him to forget the things he had done when he is intoxicated. 1 answ 11. Leaving someone who is experiencing alcohol poisoning could endanger their life because they could experience seizures that might lead to coma and even death. So if you encountered someone with this condition, immediately call 911 and place the person upright or in a Bacchus Maneuver position. 1 answ 13. Physiological dependence 2 answ 15.
