Pregnancy Tests - First Choice for Women provides free pregnancy tests, medically accurate information, and options counseling for those with a positive test. We offer a confidential, compassionate, and non-judgemental setting for women and men facing unplanned pregnancies, no matter the situation.

Pregnancy Options Counseling - Many young women feel unprepared and trapped in their circumstances, but the trained volunteers at First Choice for Women are here to guide them through this difficult time in an atmosphere of compassion and love. We provide clear, accurate, realistic information about the choices you have in a confidential, non-judgemental environment - without pressure, without politics, and without propaganda.

Post Abortive Recovery - Abortion, without a doubt, can be one of the most traumatic experiences in a person's life. The loss of pregnancy through abortion may be far in your past, but the memories remain. You may feel alone, but you're not! We will walk alongside you, assisting you as you work through this difficult time. We know that in many cases the pain of loss may initially be buried; women who have had an abortion often suffer from symptoms of post-abortion grief decades after the experience. We've

seen abortion trauma surface through relationship difficulties, depression, physical problems, psychological issues, and spiritual struggles.
