This section offers the most up-to-date and comprehensive range of printing labels, as well as containing Avery label sizes and codes guides. "Avery" is almost synonymous with "labels" but Paperstone also stock Post-it, Adpac, Durable and 5 Star brands. Our range is huge and in addition to standard inkjet, laser and copier products we sell franking, CD/DVD and speciality labels such as weatherproof, repositionable and self-laminating. Avery provides a complete solution for home printing all types of labels. Paperstone sells laser, inkjet and other label variations including clear, repositionable, heavy duty and recycled options. We also offer some of the more specialised alternatives in the range such as afterburner CD labels. Things to note... Avery labels quality assurance Laser and inkjet labels are fully guaranteed to work on all appropriate printers Their website offers online support for all your label-printing needs and allows you to download different templates for different products. Inkjet labels are now quick-dry making them smudge free Avery provide a product for almost every imaginable labelling need. They can be used for addressing, identification, filing and media with both inkjet and laser printers. There are Avery label templates available in Microsoft Word and other popular software packages. Their labels are jam-free for trouble-free printing and offer great results on colour printers, whilst leaving no residue with a 100% money back guarantee. Quick-peel labels allow for quicker and easier detachment and can save up to 25% of your peeling time. They are also compatible with the Royal Mail SmartStamp. Their clear labels can easily blend into the background of whatever envelope to which they are stuck. Printing labels from your PC can seem daunting, but for each number per sheet there is a corresponding code to use in Word so that addresses, etc. fit nicely. In Microsoft Word, under the Mailings tab, click Labels button, then Options. Choose "Avery A4/A5" from the Label vendors drop-down menu. You'll then be able to select an appropriate code (e.g. J8159) from the Product number list. The codes correspond to the number of labels per page as follows: The appropriate code should also be indicated on your product. Or you can consult this website for more printing tips. But if you require any further help, we'll be happy to help out. Call us on 0345 567 4000. If you find that your design is printing out slightly too small for your labels (i.e. the bottom of your printed template finishes just above the bottom edge of the last label on the sheet), you may want to try using our templates with extra height (these templates are set up with a label height of 38.3 mm). If you wish to make your own adjustments to the template you are using, remember you will also need to adjust the top margin to accommodate for using the larger label height. If you are working in the landscape the height becomes the width; so if your design doesn't start at the left edge of the first label in each row and end at the right edge of the last label in each row, you may need to try using the "extra" template. If you make your own adjustments, you need to remember to alter the side margins. Please note that the paper materials are sometimes cut to a label height that is very slightly under 38.1 mm. If you find that your design is printing out slightly too big for your labels (i.e. the bottom of your printed template finishes just below the bottom edge of the last label on the sheet), you may wish to try decreasing the label height. You will also need to increase the top margin to accommodate for using the smaller label height. If you are working in the landscape the height becomes the width; so if your design doesn't start at the left edge of the first label in each row and end at the right edge of the last label in each row, you may need to try decreasing the label width. Remember, you will also need to alter the side margins.] STA (Matt White Paper With Permanent Adhesive) DF (Matt White Paper With Freezer Adhesive) WW (Matt White Paper With Permanent Wash Off Adhesive) REM (Matt White Paper With Removable Adhesive) GREM (Matt White Paper With Super Removable Adhesive) HT (Matt White Paper With High Tack Adhesive) ST (Matt White Paper With Super Tack Adhesive) GW (Gloss White Paper With Permanent Adhesive) GWPQ (Gloss White Photo Quality Paper With Permanent Adhesive) SG (Semi-Gloss White Paper With Permanent Adhesive) MPQ (Matt White Premium Quality Paper With Permanent Adhesive) OPQ (Matt White Paper With Permanent Opaque Adhesive) C (Coloured Paper With Permanent Adhesive) FC (Fluorescent Coloured Paper With Removable Adhesive) REMC (Coloured Paper With Removable Adhesive) LG (Gold Paper With Permanent Adhesive) LS (Silver Paper With Permanent Adhesive) BRK (Brown Kraft Paper With Permanent Adhesive) GCP (Gloss Clear Polyester With Permanent Adhesive) GTP (Gloss Transparent Polyester With Permanent Adhesive) GTR (Gloss Transparent Polyester With Removable Adhesive) MTP (Matt Transparent Polyester With Permanent Adhesive) GWP (Gloss White Polyester With Permanent Adhesive) MWP (Matt White Polyester With Permanent Adhesive) MWR (Matt White Polyester With Removable Adhesive) SMP (Silver Matt Metallic Polyester With Permanent Adhesive) MWPE (Matt White Polyethylene With Permanent Adhesive) MWPO (Matt White Polyolefin With Permanent Adhesive) SVP (Silver Matt Metallic Polyester With Permanent "VOID" Adhesive) TEV (Tamper Evident Vinyl With Permanent Adhesive) Please note that these templates are provided in good faith for our customers to use free of charge. Customers should test the suitability of these templates for their requirements (including compatibility with their software/hardware) and are responsible for making any necessary adjustments to achieve the best possible alignment. All products are manufactured with a tolerance, which is an allowable deviation from the measurements stated on the goods (for example, an A4 sheet may have a tolerance of +/- 2 mm); this tolerance can lead to slight variation in the measurements of label products and so we recommend that customers complete a test print of any template before printing onto their label products so that they may determine if the template requires any further adjustments.
