Victorian Scrapbooks - The Journal of Antiques and Collectibles

Scrapbooking was so popular and covered so many different subjects in the Victorian Era that families often created small libraries devoted to their scrapbooks, methodically arranged by categories and topics with richly embellished and ornately designed covers. For the ordinary Victorian housewife, however, a scrapbook was not always so ambitious or richly embellished. Recipes, poems, photos, and recorded family events were typical scrapbook topics, containing information that today might only make sense to its owner. Scrapbooks made from newspaper clippings often focused on obituaries of not only family members but those whose interests included chronicling weird or gruesome deaths, popular celebrities of the day, and current events. And Then Came Photography The invention of photography changed scrapbooking forever. By the late s, a form of

photography called carte de visite visit card started to spread across the United States from Europe.

These small photos were about the size of a calling card and were especially popular during the Civil War era. Cartes de visite were printed on sheets containing eight photographs, and it was common to trade them with friends and family or to purchase prints of celebrities. This led to the desire to preserve the collected photos in albums — creating the first true scrapbooks! As the 20th century dawned, another invention forever changed the scrapbook: the Brownie camera. Until the introduction of the Brownie camera in 1900, photography was something that was done professionally and mostly in studios, which made it time-sensitive and expensive.

Instead of having their photo taken a few times over the course of their lives, people began to have their photos taken regularly. With the snapshot came a more modern concept of creating the family photo album. In contrast to the previous formal albums of staged portraits, these new snapshot albums were much more casual. The current model of scrapbooking is essentially an embellished version of this family photo album that was born from the invention of the Brownie. By the early 1900s, some people began combining casual photos with scraps of important memorabilia, letters, and decorative die-cuts and printed images into the same book in a decorative manner.

Physical Description The two scrap albums or scrapbooks feature covers with elaborately-embossed bindings. Inside are pages of colourful pictures, which have been commercially produced, embossed and die-cut, then glued onto the heavy pages. The pictures or 'scraps' are in most cases carefully arranged by themes including flowers, butterflies, baby farmyard animals, and well-dressed ladies and children. Some of the pictures are more exotic and include children in various national costumes, mounted cavalry, as well as humorous caricatures and the more sentimental elements such as white doves, angels and Christmas themes. A few of the pages have pressed and dried flowers and ferns and birthday cards with verses. **Production Made Notes** Scrap is the term used to describe pieces of paper, usually printed in colour and often embossed or die-cut, which were collected and arranged in albums.

The earliest scraps appeared at the beginning of the nineteenth century and were simple black and white engravings which were often hand coloured. By the 1850s scraps had become more elaborate and were produced on picture sheets on a matt surface which children were intended to colour or draw from. Embossing soon followed which involved a die being stamped into the reverse side of the paper giving it a raised quality. Young women of the leisured classes used these sometimes beautifully bound scrapbooks to showcase the talents expected of an accomplished lady. A modern day scrapbook is a combination of a photo album, diary, journal and a keepsake. Disposable paper items such as trade cards, die-cuts and greeting cards were collected by both children and adults and pasted into Victorian scrapbooks. These decorative albums were composed of "scraps," collectible cards, and trade cards, which were. Sheet of scraps with stamped embossed reliefs, chromos or die cuts of small paper images could be purchased for the making of scrapbooks. Some 19th century scrapbooking albums were made with elaborately tooled leather covers, engraved clasps and brass locks.
