

D H RENEWABLES  
A TECHMAR COMPANY

Providing pre-assembly, main assembly, commissioning, troubleshooting and service, including all statutory inspection works on all wind turbine manufacturers and models. We also offer Cleaning components, paint repairs and retrofit campaigns

# OUR BACKGROUND

## BRIEF HISTORY

DH Renewables was established in 2017 with the vision and commitment of supporting the renewables industry. We continuously strive to improve industry standards for both ourselves and our customers. We truly believe in always raising our benchmark to become an industry leader in our field.

# WHAT WE DO

Experienced in all major manufacturers, DH Renewables provide pre-assembly, main assembly, major component exchange, commissioning, troubleshooting and service, including all statutory inspection works on all wind turbine manufacturers and models.

Over the last 4 years we've built an extensive portfolio of successful projects, both onshore and offshore.

With many years experience working at height and in harsh, remote environments, the D H R team understands that good communication between on-site teams, project managers and the client is paramount to delivering quality services on time. With a continuous improvement approach to our work, we are constantly looking for methods to improve safety and increase efficiencies to deliver vital cost savings for our clients.

# SERVICES WE PROVIDE

SCAN ME

A worker wearing a white hard hat, safety glasses, a dark jacket, and high-visibility yellow-green trousers stands next to a blue van. The van has a yellow logo that reads "D'HALL RENEWABLES A TECHNICAL COMPANY". The background shows a construction site with gravel and some trees in the distance.

“ DH Renewables have provided 6 technicians to Hornsea 2 Preassembly site over the last year. The team that has been provided is technically gifted, driven, committed and reliable working to exceptionally high standards of quality and professionalism. The interactions we have had with the company have been of the highest order and certainly show the high standards and high level of professional courtesy we would expect here at SGRE. This is a company that is on rise with its elevated standards and team of reliable and technically gift people. The sky is limit for them going forward! I will personally be recommending that we use this company again here at SGRE on future Offshore preassembly projects. Thank You D H Renewables it has been a pleasure working with you on the Worlds Largest Offshore Wind Farm Hornsea 2!!
