4MOST NEWSLETTER - APRIL 2021

The COVID-19 outbreak, which has infected more than 150 million people and killed over 3 million people worldwide, has altered life as we know it. Where and how we dine and relax, where we can and cannot go to, how we relate with family and friends, and how we learn at school have all been altered in what is described as the "new normal". Inevitably, our workplaces have to be readapt to these times to keep workers safe, healthy, and productive.

Please be ensured that we at 4most will keep supporting you and your business.

What's in store for you in this month's newsletter:
1. Blockchain explained: What is it?
2. SAP Business One tip of the week.
3. 4most's Client Care Centre, Custom Development and Hosting.
4. Blockchain explained from an enterprise perspective

What Is Blockchain Technology?

Today's businesses are turning to enterprise blockchain for transparency and security. Organizations are searching for a simple blockchain definition to help them understand this emerging, "distributed ledger" technology. Here's what savvy companies need to know about what it is, why it matters, and how it works.

- **Why is blockchain important?**
- **How does blockchain work?**
- **What are the key benefits of blockchain?**
- **What are the four types of blockchain networks?**
- **What is blockchain used for? Use cases and examples**

Blockchain explained from an enterprise perspective

The simplest blockchain definition? A reliable, difficult-to-hack record of transactions – and of who owns what. Blockchain is based on distributed ledger technology, which securely records information across a peer-to-peer network. Although it was originally created for trading Bitcoin, blockchain's potential reaches far beyond cryptocurrency. Blockchain ledgers can include land titles, loans, identities, logistics manifests – almost anything of value. The technology is still new, but the potential impact it can have on business is exciting, and immense.

Save Doc Address to BP? Yes, You Can!

Most of the time most things are as usual. Same process, same flow no surprises and no need to deviate from the regular root. That's true most of the time but sometimes… we need to do things a little different.

Hosting with 4most

We offer the option of hosting your SAP Business One Solution in our Data Centre. This means that essentially your software solution would be hosted off premise and accessed through a public or private internet connection. In addition, we right size the infrastructure for the real business requirements, while aligning with existing data centre standards in terms of infrastructure, tools, operational processes and existing skillsets. It's all about achieving a standardisation of IT principles.
