

4MOST NEWSLETTER - MARCH 2022

With the 1st quarter behind us it is of utmost importance, to add value to our clients' businesses. Sharing our clients' success stories on how SAP Business One from 4most has added value to their business is still a keen focus of ours. Should you wish to share your story on how SAP Business One from 4most has added value to your business, please let us know.

As we had a lot of enquiries about SAP Business One Microsoft 365 Integration, we include some guidelines in this month's newsletter.

What's in store for you in this month's newsletter:

1. SAP Continues to Stand in Solidarity with the People of Ukraine
2. Microsoft Selects RISE with SAP to Drive Business Innovation
3. The Apprentice Opportunity: Using an Old Model to Recruit Fresh Talent
4. How to work with SAP Business One Microsoft 365 Integration

SAP Continues to Stand in Solidarity with the People of Ukraine

On March 2, we stopped all sales in Russia and then Belarus. We have immediately implemented all international sanctions without exception, and are in constant contact with our government counterparts to remain aligned with their strategies to end this war. We appreciate the resolve and intelligence with which governments have come together on coordinated sanctions and welcome the announcement of new international sanctions expected soon.

Microsoft Selects RISE with SAP to Drive Business Innovation

Microsoft has chosen to adopt the RISE with SAP solution on Microsoft Cloud, shifting the company's SAP ERP software systems to SAP S/4HANA Cloud, private edition.

RISE with SAP will allow Microsoft to deploy new capabilities and technologies faster and run its business on a flexible cloud-first solution that is integrated with the other cloud solutions from SAP that Microsoft uses.

Microsoft is the first public cloud provider to adopt RISE with SAP internally to transform some of its large SAP ERP deployments. The decision to adopt RISE with SAP builds on its wide adoption of SAP solutions. These include SAP SuccessFactors solutions, the SAP Integrated Business Planning for Supply Chain solution, SAP Business Technology Platform and other SAP solutions running on Microsoft Azure. Microsoft's implementation of RISE with SAP will deepen Microsoft's expertise with SAP solutions and establish best practices that can be shared to the benefit its and SAP's joint customers.

The Apprentice Opportunity: Using an Old Model to Recruit Fresh Talent

Apprenticeships have been a straightforward model of entry-level training since they were established centuries ago. Pay a young person just starting out (in money or in-kind) to learn skills while performing needed tasks. After a prescribed period, recognize the apprentice's experience gained with a credential so that they can pursue their livelihood.

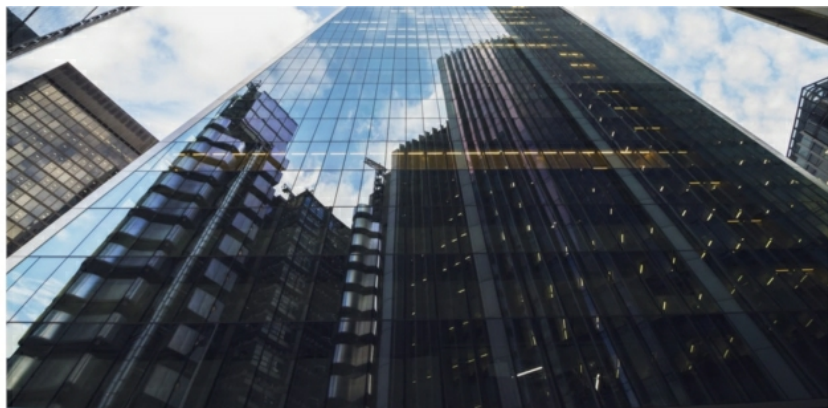

The model has always been limited, however. In ancient days, it produced bakers and blacksmiths. More recently, it has climbed the ladder to more complex work, such as plumbing and electricity. But apprenticeship has generally not penetrated the rarefied atmosphere that surrounds work that is believed to require a college degree.

It's time for a fresh look.

Especially in an environment where labor is in demand and technological advances mean workers need to continually learn new skills, the apprenticeship model opens up new talent sources for employers.
