

## 4MOST NEWSLETTER - JANUARY 2023

With 2022 behind us, we wanted to reach out and send our best wishes to you and all your colleagues! We hope that 2023 holds success and good fortune in any endeavour you pursue. It is a pleasure to do business with you. Thank you for all the work and trust you put on the 4Most team, we are looking forward to a great new year of watching you grow and supporting you all the way. May the New Year fill your heart with love and your pockets with profits. Happy and Prosperous New year!

### What's in store for you in this month's newsletter:

1. Increase Productivity with the Latest Innovations in SAP S/4HANA Cloud, Public Edition
2. Does Your Business Have a Talent for Sustainability?
3. SAP Business One Tip of the Week
4. 4most's Client Care Centre, Custom Development and Hosting.

### Increase Productivity with the Latest Innovations in SAP S/4HANA Cloud, Public Edition

With the SAP S/4HANA Cloud 2302 update available in February, SAP is delivering new modern experiences, foundational capabilities, and core enterprise resource planning (ERP) innovations to improve organizational and employee productivity.

Over the last year, we have been pleased to see an increase in user adoption and customer satisfaction, and we always look for ways to make the product better based on customer and partner feedback.

### Does Your Business Have a Talent for Sustainability?

If the goal is specific, such as designing new products, you might carve out a group of experts who can focus without distractions.

Here's why businesses need to become talented in sustainability: besides the obvious world-saving implications, more than 60% of respondents to an SAP Insights survey of 6,669 business leaders in 40 countries say that sustainability has a moderate or strong effect on long-term competitiveness and profitability.

## New Year, New Period Indicator

Don't get carried away; this is way too much; really, above and beyond! In most cases exaggeration is perceived as negative and leads to unpleasant results: working too hard may end up with sickness and early burnout, driving too fast might cause an accident, and drinking too much... well – you got the point. While avoiding exaggeration and keeping things in balance is highly appreciated, when it comes to financial reporting and bookkeeping there is no such thing as too much accuracy or clarity.

*By Ari Schapira - Senior Director Product Management - SAP Business One at SAP*

### Custom Development

4most offers a wide range of Custom Development Services. We aim to optimally tailor and increase the business value of your SAP ERP solution. We are able to achieve this by using the latest software development platforms and tools, complemented by standardised project management techniques and software engineering practices. We have outstanding experience in custom database development, desktop and distributed application design, system integration and business automation tools as well as various custom software components and web-project programming.

### Hosting with 4most

We offer the option of hosting your SAP Business One Solution in our Data Centre. This means that essentially your software solution would be hosted off premise and accessed through a public or private internet connection. In addition, we right size the infrastructure for the real business requirements, while aligning with existing data centre standards in terms of infrastructure, tools, operational processes and existing skillsets. It's all about achieving a standardisation of IT principles.
