PERMANENT MAKE-UP PRE PROCEDURE INFORMATION

FOLLOWING THE BELOW INSTRUCTIONS WILL ENSURE THE BEST POSSIBLE RESULTS FROM THE PMU PROCEDURE.

- **Permanent Make-up is not a science, it's an art and an adjustment of color or shape that might be required.**
- **Please remember the treatment is not considered complete if there was no follow-up session done, in the specific time period.**

- All permanent make-up procedures are multi appointment procedures. You will need **2 sessions, 4–8 weeks** apart, and then a color boost every **12–24 months** depending on the technique used.
- It is important that the skin is not irritated or sensitive before the procedure.
- Avoid having any facials or facial peels for two weeks prior to the procedure.
- Do not work out on the day of the procedure.
- Do not wax or thread the area less than one week prior to the procedure.
- Avoid excessive exposure to the sun for two weeks prior to the procedure.
- Avoid any natural blood thinners that will cause excessive bleeding during the procedure. Excessive bleeding will have a negative effect on the longevity of the results.
- Refrain from consuming alcohol, aspirin or ibuprofen for 24 hours prior to the appointment.
- Refrain from Vitamin E, Fish Oil Capsules and Retinol products for one week prior to the appointment.
- Avoid consuming energy drinks and coffee for up to 24 hours prior to the appointment. The less caffeine in their system the better.
- Avoid Botox or fillers for 4 weeks prior to the procedure.
- In order to achieve an accurate shape and result it is important that the your facial muscles are fully relaxed during the procedure.
- **The treated area will become red and inflamed, so it is advised not to make any social engagements for a few days thereafter.**

- Before and after photos will be taken for our records only and will not be published without a clients consent.

- Sensitivity of the application is greatly increased if a client is premenstrual.

Eyeliner

- Don't cry before eyeliner procedure. Please do not wear your **contact lenses** during or directly after the procedure until swelling has completely subsided. Remember to bring your glasses.
This is only for EYELINER procedures.
- Please remember to remove all your **eyelash extensions, 3 days prior** to your permanent **eyeliner procedure**, it can only be **reapplied within 4 weeks.**

Lips

- **Lip application** will be extremely dark and then flake or scab to almost invisible. Allow at least **21–28 days** to determine the amount of color retained. Due to the nature of the mucous membrane the color will always have a subtle end result. Very deep, dark colors are almost impossible to achieve.
- **This is only for Lip procedures.** If you have a **history of cold sores or fever blisters**, it is recommended to **visit your GP prior to any lip procedures to prescribe oral medication.** Failure to do so will result in a herpes simplex break out and can destroy or interfere with your permanent make up end result.

Brows

- When your procedure is completed the color will be intense and very dark. It will take **3-5 days** for this color to settle and heal in the skin allowing a soft natural color to emerge.
- **If you have a extremely oily skin the Microblading technique will not work well for you.** The constant production of oil will cause the hair strokes to heal with a diffused, softer look. That will cause your healed result more powdery then desired.

DAY 1	I am in love with my new permanent makeup.
DAYS 2-4	I do not like this colour. It's way too dark.
DAYS 5-7	Oh no! My brows are scabbing and falling off.
DAYS 8-10	My Brows are gone!!
DAYS 14-28	Thank you! My Brows are coming back. Its still a little patchy and uneven.
After Touch-up	Awwww! They are beautiful. I love them!

PERMANENT MAKE-UP AFTERCARE

BROWS

- **PLEASE NOTE: Eyebrows will appear darker and bolder due to natural scabbing and healing for the first 5 days. This is very common for all permanent cosmetic procedures.**
- Within the first few hours after the procedure, you can gently wipe over your eyebrow area with a cotton disc rinsed in Luke warm water. This step must be repeated the morning after the procedure as well. This removes any lymph discharge.
- Apply after care ointment once a day for two weeks after the procedure. Do not use too much, only seal the area, this will allow the skin to still breathe.
- No scratching, rubbing of the treated area as when you pick a scab the pigment may be removed.
- Avoid heavy sweating for the first 5 days.
- Avoid direct sun exposure or tanning for 3-4 weeks after the procedure.
- NO facials, Botox, chemical treatments or microdermabrasion within 4 weeks.
- **Very important is to never allow foundation to cover the eyebrows.** This will result in grey looking eyebrows with foundation over it.
- Permanent makeup on eyebrows will always look stunning when you have your eyebrows hair tinted regularly. We place pigment under the skin. Hair is on top, and it will make your PMU appear lighter. Remember to tint your eyebrows regularly.

TAKE NOTE: After all Permanent Make-Up procedures the colour will be very extreme and vibrant until the healing process is complete. It is normal for areas to lose colour and fade with time, Perfection and durability will be achieved on the touch up procedure.

EYELINER

- First 3 - 5 days no water, cleansers, creams, make-up or any other products on or near the treated area.
- Apply after care for eyes with a eardrop, once a day.
- Do not use mascara until outer healing is complete (3-5 days).
- No scratching or rubbing of the area, until its healed, as this might remove some of the pigment.
- Eyes may be dry or irritated, a lubricating refresher eyedrops may be used.
- When healed the colour will be very light, it will take 3 - 4 weeks for the skin to settle and the final result to show.

PLEASE NOTE: Eyeliner will appear darker and bolder due to natural scabbing and healing, allow area to naturally exfoliate. Within 3-5 days the eyeliner will be finer and lighter. This is very common for all permanent make-up procedures

LIPS

- Wash your hands and then gently rinse your lips with lukewarm water an hour after treatment to remove build up and lymph.
- No cleansers, creams, make-up or any other products on treated area for 5 days.
- Eat carefully and drink with a straw the first 24 hours.
- Avoid direct contact with toothpaste and mouthwash as it contains bleaching agents.
- Lips may be swollen use an ice bag to relieve swelling if needed or drink an antihistamine tablet.
- During healing process, 5- 7 days apply ointment with a cotton bud when dry.
- Do not apply any topical cosmetics over the treated area.
- For the next 3 days, blot area lightly if fluid occur.
- Continue anti-viral treatment for 5 days if you are prone to fever blisters [herpes simplex]
- When scabbing occurs allow to peel off naturally, do not pick or pull as it will influence colour retention.
- Lips will be very light, and the color will settle in 4 weeks time.
- If there is any unevenness on lips, don't be alarmed, that is why we do a touch-up where we will finish off the colour and form.

PLEASE NOTE: Lip Liner and Full Lip colour will appear darker and bolder, allow area to naturally exfoliate. Colour will fade up to 60% depending on skin type, within 2 weeks. The final results will only be visible after 4 weeks.
