WHERE IS BORN CSC

CS:GO SKINS COIN was born from a common passion between 3 friends and Counter Strike players since its launch on 1.6 in 2003.

Since then, years have passed and today we are on the Global Offensive version !

As you know, and like on many other games, skins are important for some players, including us.

The community of CS:GO players is fan of all these skins offered in the game. And the market for CS:GO skins is really very impressive.

Some skins can range from 0.05 cents up to crazy sums like 100k or 150k dollars.

We have decided to create a crypto that will bring together a large online community every day on our discord, we will be able to play together, schedule giveaways and distribute as many skins as possible for many of you.

we are also big players in online casino drop skins such as hellcase and csgoroll and many others.

WHAT IS OUR TOKEN

CsC is a community token that brings together all CS:GO gamers on our daily discord.

You are alone ? or with your friends?
join our discord, play with other players who are looking for others, create your 5v5 team. and win skins all days !

WHAT DO WE WANT TO BRING IN THE CRYPTOSPHERE

In the near future, your **CSC** will allow you to play to try to x2, x5, x10, x100, and more, your bag.

Keep in mind that the longer you keep your bag, the more you will be rewarded.

Apart from holding a simple token, you will also be part of a strong and united community with weekly giveaways, a listening and active staff.

CSC is the next evolution of a yield-generating contract on the **Binance Smart Chain (BSC)**: you get rewarded in \$BUSD. The token contract employs a static reward system—**13%** of every transaction is split in three parts:

5% BUSD is redistributed to holders

3% is used to fuel the liquidity pool exchange growth

5% is allocated to the marketing fund

Regarding the marketing wallet, it will not be rewarded in BNB, but directly in CSC.

In the next chapter, we explain the purpose of this project, and you will understand why CSC will become rare and will be in great demand for our future site.

This is why we will remunerate our collaborators in CSC, and this will allow us to earn tokens for holders through different giveaways.

We make you win skins, but also CSC !

THE PURPOSE OF THE PROJECT

Aside from being a community token, the purpose of this project will be far-reaching.

We are going to create an limited NFT's series of Weapons and we will open a gambling site in mid-2023 which will offer you the opportunity to open cases of skins using your tokens.

You will be able to :

- Win skins that are very expensive
- You can resell these skins instantly to get more tokens, or resell the skins directly for cash.
- Even if you are not a CS:GO player, we will explain how to resell these skins and get cash directly in our Telegram.
