

SKY EXPERIENCE 2024

NEW BRUNSWICK ECLIPSE RETREAT

April 7- 9th, 2024

CLIFF VALLEY
astronomy

HOW SPECIAL ARE TOTAL SOLAR ECLIPSES?

Besides being incredibly already rare in frequency, several decades can pass before another total eclipse visits the same location. In New Brunswick's example, the last Total Solar Eclipse was in 1972 and even back then it only visited a small portion of the northeast corner of the province.

The real reason is the visceral experience you'll live as the Moon begins to journey across the face of the Sun. Slowly the sky begins to dim, and as they both begin to align almost perfectly, you don't just notice almost night-like darkness but the temperature cooling as well. The wildlife begins to act as if it is nightfall, including total silence from usually vocal animals like birds, an obvious sign that something amazing is happening.

For avid astronomers, astrophotographers, photographers, the opportunity to capture the three sequences of the totality.

It begins from the corona (diamond ring), then Bailey's beads to the final corona which is the only time you can see with your own eyes the Sun's most outwardly layer.

The sun's atmosphere has a ring of white to the yellow haze around the edge of the Moon and the expected time of totality will be around 2 minutes.

What an amazing experience you'll remember for the rest of your life and most a once-in-a-lifetime opportunity!

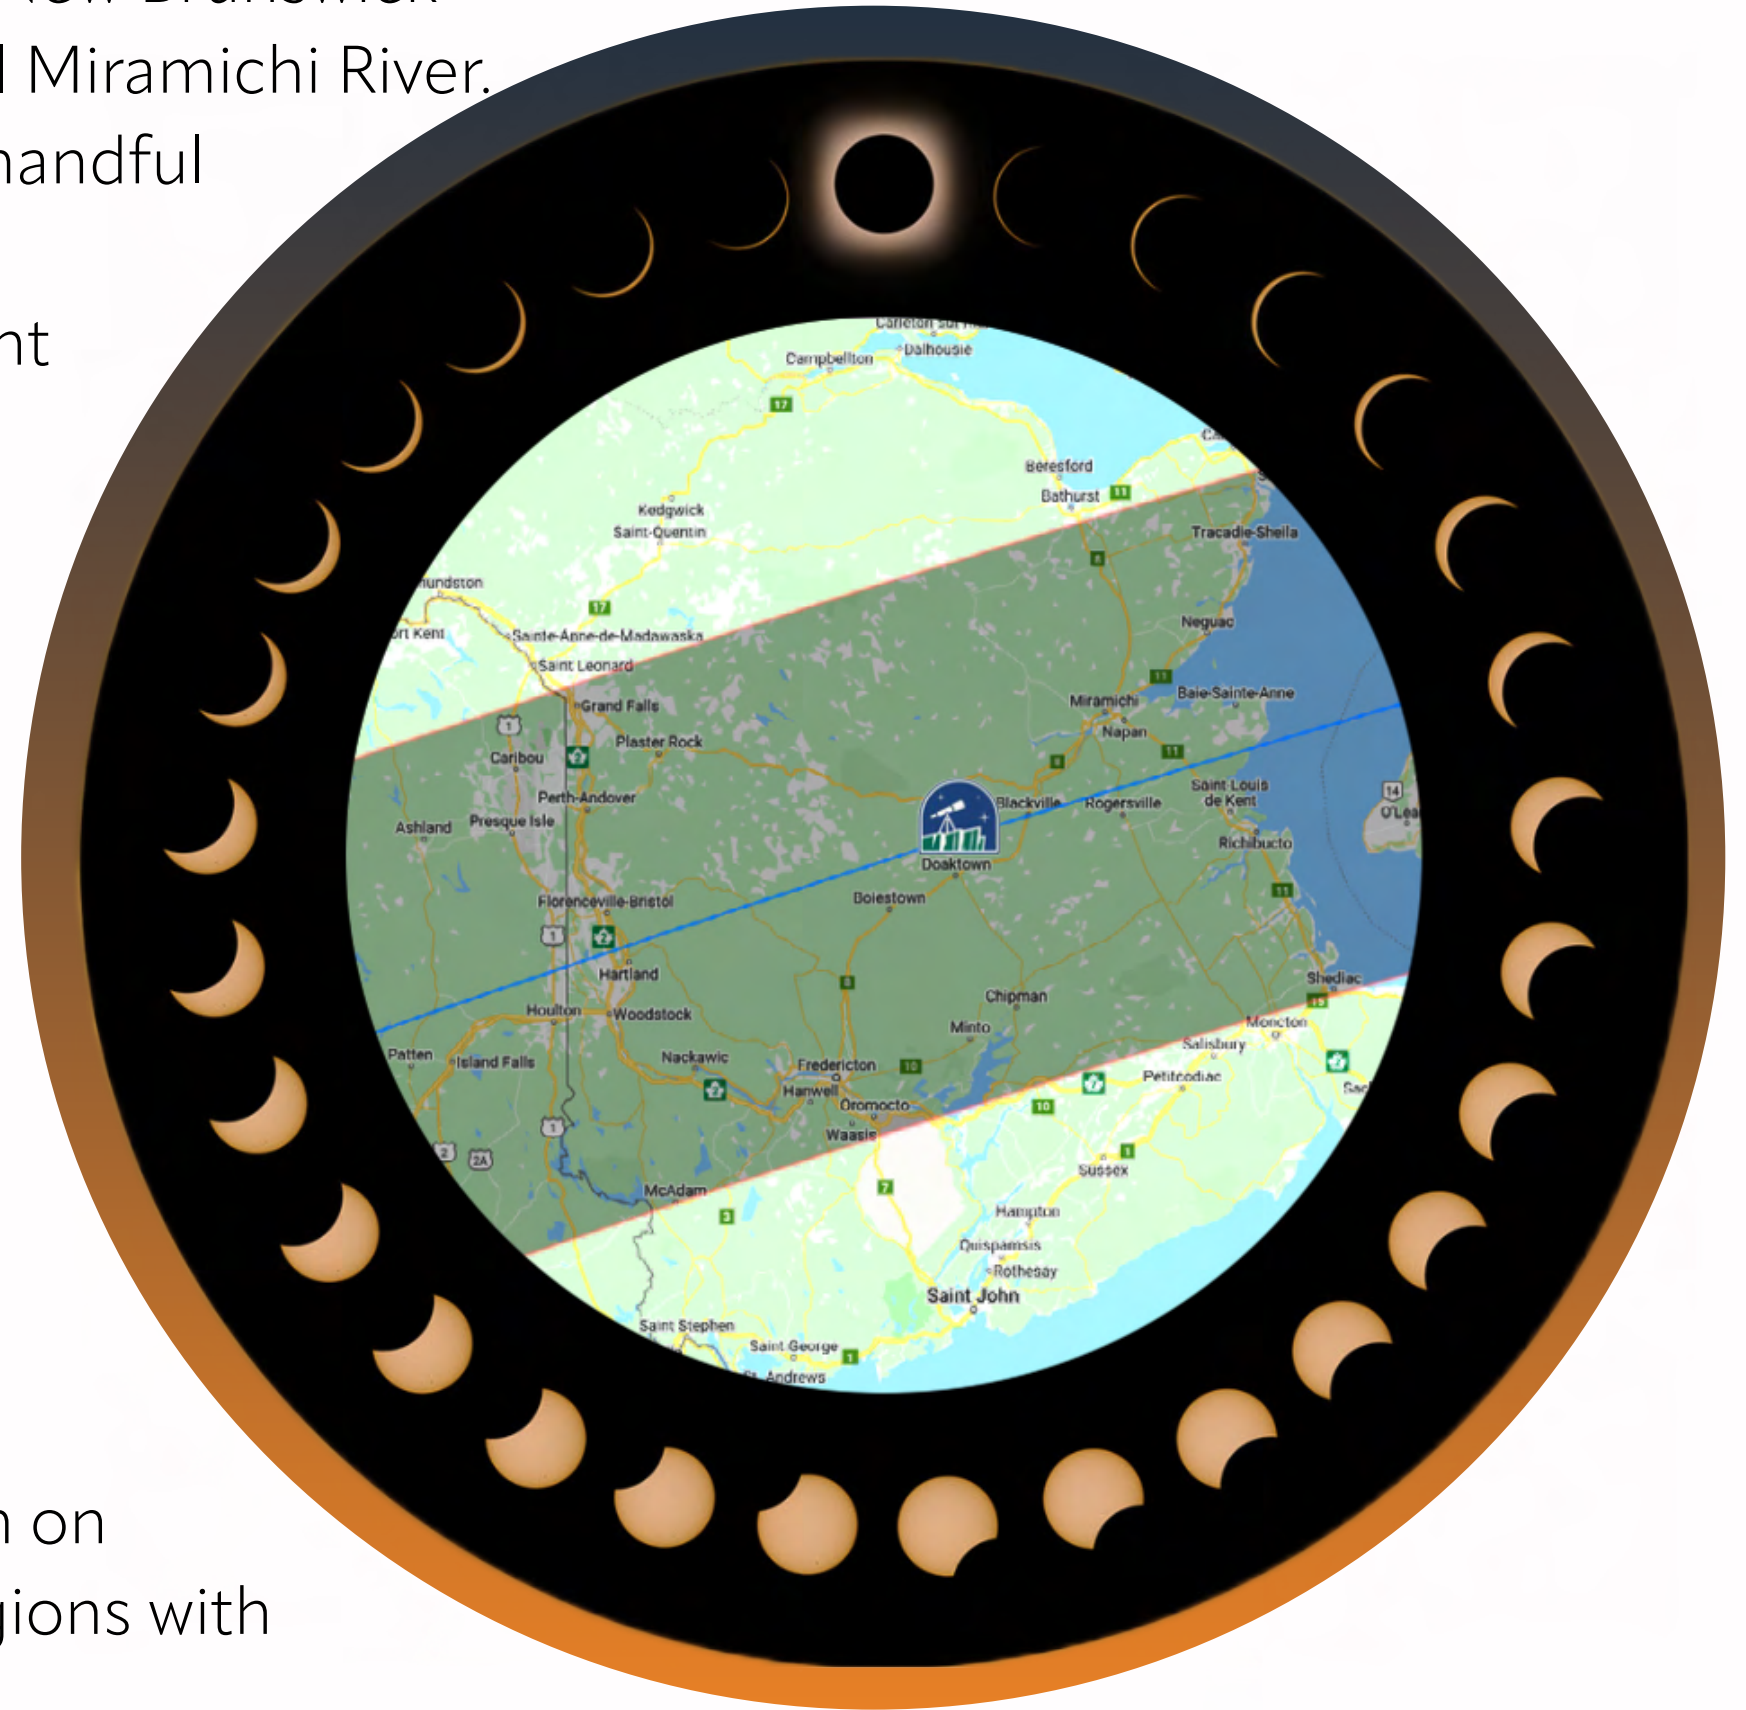

When the great complete solar eclipse visits New Brunswick on April 8th, 2024, it will have been more than 52 years since the previous complete solar eclipse visited our province. Back in 1972 it only passed through a small portion of the province coming across the picturesque Acadian Peninsula in the Northeastern section of the province. The eclipse will be by all accounts the most special celestial event in Eastern Canada, if not, all of Canada. It will cross from West to East nearly in the central region of New Brunswick as this presents a very accessible event as most people will be fewer than 60 minutes from the path of totality. Thusmaking New Brunswick the most attractive jurisdiction in all of Canada for this important once-in-a-lifetime celestial event for most people!

Doaktown is a beautiful rural community in central New Brunswick along the upper valley of the powerful and beautiful Miramichi River. It provides the perfect location as it will sit within a handful of kilometers from the centre of the path of totality of the complete solar eclipse path. The area is sought by avid eclipse chasers from around the world, avid amateur and professional astronomers, and photographers to observe and capture that so rare moment.

Where, the eclipse reaches its corona which is when the Moon completely covers the disc of the Sun just allowing that so very magnificent halo of light all around the edge of the cosmic embrace both discs share for several seconds. This presents the climax of the entire process that progresses in a little more than a couple of hours. Doaktown's real strength does not only rely on its fortuitous location on the map as one of New Brunswick's most famed regions with its beautiful nature.

Its people and its business community and amenities make it the ;natural choice for us to plan and create the best eclipse adventure package in all of Canada.

We will cater to a niche market targeting national and international eclipse chasers, accomplished astronomers, and photographers.

Find why our offering is perfect for you, for the once-in-a-lifetime chance to enjoy the great total solar eclipse of 2024

RETREAT ACCOMMODATIONS

We are partnering with Storeytown Cottages and the Ledges Inn to bring you the event from their properties, with amazing views and access to the Miramichi River

Storeytown Cottages is a campus of rustically beautiful and cozy cottages and cabin suites that feature standard and deluxe amenities hot tubs, firepits, and Starlink Internet.

Besides these great accommodations, their private property will serve as the base for most of the sky and nature observation activities. You'll also get to experience the bird and wildlife reactions to the complete eclipse.

The Ledges

For the adventurer who feels more at home in a more contemporary setting, the Ledges Inn is your perfect choice. It will also serve as the venue for most meals and entertainment activities. The Inn contains ten rooms and is located near the centre of town and overlooks the Miramichi River from the south shore."

Now that we've covered where you'll lay your head and eat and play let's dive into the play aspects with the amazing and informative speakers and presentations we've lined up for you.

We have built an agenda designed to keep you busy and inspire your creative thinking. In addition to all the astronomy events, we've enlisted presenters that will discuss birds and wildlife and will take you on a birding excursion.

At night we will have some of eastern Canada's most proficient and avid astronomers, who will provide some amazing stargazing in the amazing dark skies of Central New Brunswick with several high-end telescopes. We also have some great photography topics planned as well as several cameras, astronomy, and Astrophotography equipment, and product demonstrations

ALL-INCLUSIVE MEALS SNACKS & REFRESHMENTS

You'll be provided with a culinary experience that will impress your gourmet taste buds with nutritious and locally sourced ingredients from Atlantic Canada. Every evening supper will consist of three-course meals paired with wine and craft beverages to create the most satisfying gastronomical experience.

All your breakfast and lunches will provide a wide selection of choices from the healthy eater to the health-conscious eater. Attention and care will be provided to any dietary restrictions, food requirements, allergies, and sensitivities. You'll be able to pick your options in the days leading up to the event.

Your accommodations will include a snack basket upon your arrival.

We've also partnered up with wine and beverage partners to provide the perfect accompaniments whether with your meals or for a socializing by the fireplace.

OUR PACKAGES

Packages include:

- Two-and-a-half days of activities
- Presentations
- Accommodations
- Morning Yoga with Susan Zurawski
- Star party (weather permitting)
- All meals.

As a thank you for choosing Sky Experience 2024 , you will also receive a "swag bag" upon arrival.

The Storeytown Cottages Package Options Located just minutes outside of Doaktown, Storeytown Cottages is a wildlife and nature small cottage resort popular with outdoor adventurers of any season to take advantage of the powerful Miramichi River for fishing, kayaking, tubing, & . other seasonal activities drive sport and hobby enthusiasts to this tourism destination from snowmobilers more.

COTTAGE #1

ROOM #11 is in the second building and has a queen bed, balcony, and a fireplace. \$1,700 double occupancy or \$1,400 single occupancy.

OUR SPEAKERS: RICHARD ZURAWSKI

Richard Zurawski has a weekly science question and answer show on Q104 (radio) in Halifax (Q-Files). And has previously been an on-air meteorologist and science reporter for the CBC, CTV, GlobalTV, and Rogers Media.

He was an elected HRM (Halifax Regional Municipality) Councillor for District 12 & served for four years (2016-2020). He also had the role of the Green Renewal Critic the Green Party of Canada shadow cabinet.

He is in the final stages of my PhD at MSVU, specializing in Climate Change and the media. He also has a B.Sc in physics and an M.A. (Research) in education. He lectured+ at Saint Mary's University and Mount Saint Vincent University from 2011-2017.

As a documentary film maker Richard has produced, written and hosted numerous science and history documentaries, broadcast domestically and abroad. He has syndicated three children's television series, Wonder Why?, The Adventures of the AfterMath Crew and WiseWeatherWhys.

He has published four books, the first about Maritime weather, the second about climate change, the third about the media in science, and his fourth, The Science Files - Questions and Answers From A to Z is based on the questions and answers of his on-air listeners. His work to promote science and learning on all levels was rewarded in November of 2013 with the Discovery Centre's Science Champion Award.

OUR SPEAKERS: TREVOR JONES

Trevor Jones is a full-time astrophotographer and content creator sharing his 10+ years of knowledge and experience on his resource-sharing platform, AstroBackyard. With a background in graphic design and marketing, his videos reach nearly half a million YouTube subscribers, providing learners with equipment options, image acquisition tools, and advanced image processing techniques. Trevor's involvement in astrophotography extends to the greater community as a photography contest judge, dark-sky advocate, and public speaker. He is especially passionate about making this hobby more accessible (and fun) to those who are new to their astro journey.

Presentation : **An Introduction to Deep-sky Astrophotography:**

Trevor Jones, from AstroBackyard, will describe his process of photographing stunning deep-sky objects, like galaxies and nebulae, from his own backyard. From building a beginner-level astrophotography kit to image processing tips and tricks, this presentation will open your eyes to what is now possible using amateur equipment. His simplistic approach will help you avoid the frustration & confusion many astrophotography beginners face, and set you on a path to success.

OUR SPEAKERS: ASHLEY NORTHCOTTE

Ashley Northcotte is a geographer, educator and communication professional who has worked in education, technology, and the government sector as an environmental advocate. Over her career, Ashley has been committed to driving environmental protection through communication plans, education campaigns and public outreach. In her current role as a STEM communicator, Ashley focuses on making astrophotography and astronomy more accessible and inclusive through digital media. As a Dark-sky Advocate/Delegate with the International Dark-Sky Association, Ashley spreads awareness about the negative and harmful environmental impacts of light pollution to drive local and global change.

Presentation: **Light Pollution is Getting Worse. We Can do Better.**

Artificial light from urban areas continues to threaten the human experience of viewing an unspoiled night sky full of stars. But losing our ancient connection to the stars is just one part of a much larger problem. An increase in light pollution worldwide has long-lasting damaging effects on nature, humans, and the environment. Learn how we can largely reverse these negative effects by taking simple actions so future generations don't pay for our mistakes.

OUR SPEAKERS: ROB & LISA ANN FANNING

Have you ever wondered what kind of sparrow that is? Or that there are different types of gulls? What sings that song in the morning? Join Naturalists, Rob and Lisa Ann Fanning on a casual bird walk as we look for resident species and early returning migrants. They will also assist with observations during the eclipse.

Rob Fanning is a life-long resident of New Jersey, and has been birding since the age of 10. He has lead trips for various organizations throughout New Jersey for over 20 years and is a full time environmental specialist with the County Park System. He has traveled extensively for birding to such locations as Arizona, Texas, Belize, Costa Rica, Ecuador & Puerto Rico. His world life list is around 1250 different species of birds. He also enjoys other aspects of the natural world, such as Dragonflies, Butterflies & Moths. He holds his Explore the Universe Certificate from the Royal Astronomical Society of Canada.

Lisa Ann Fanning was born in New York City, and has lived in Massachusetts before settling down in New Jersey. She has been birding for over 13 years, but appreciated the natural world long before that. With a strong interest in Marine Sciences, she gravitated toward helping monitor endangered shorebirds at the Jersey Shore and is a naturalist for the American Littoral Society. She is an amateur astronomer who prides herself on inspiring new astronomers and the curious to "Look Up!" as part of her "Lisa's Look Up!" Facebook page. She is the newsletter editor for RASC Halifax's Nova Notes and currently holds observing certificates for Explore the Universe and Explore the Moon. She has appeared on the Sunday Night Astronomy Show and various other programs talking about the connection between the animal/avian world and astronomy.

PAYMENT PLAN

Cliff Valley Astronomy has an affordable payment plan:

- 40% at the time of booking
- 30% on July 1st, 2023
- 30% on February 1st, 2024

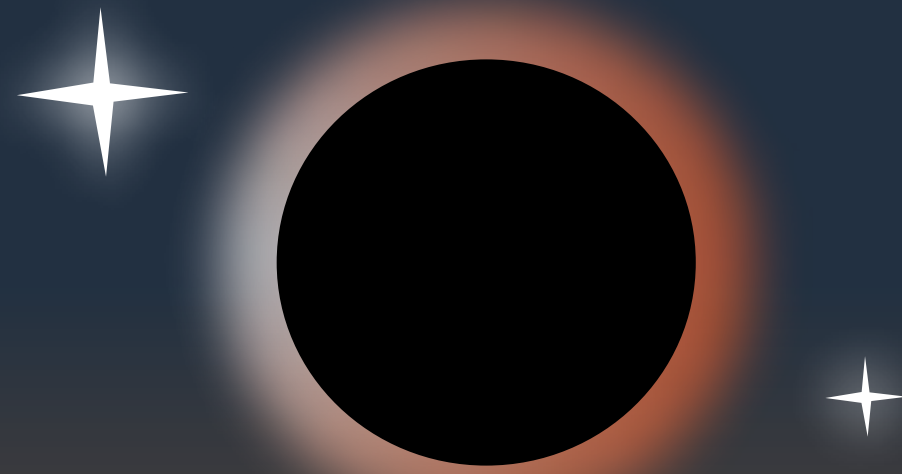

Waiting List

If Experience 2024 sees all its packages sold by May 31st, a waiting list will be offered with a deposit of \$250 required but 100% refundable if no cancellations create open available vacancies.

Cancellation policy and late cancellation penalties:

- Cancellation by September 1st, 2023 = 100% refund
- Cancellation by November 30th = 75% refund
- Cancellation after February 1st = 50% refund

SKY EXPERIENCE 2024

NEW BRUNSWICK ECLIPSE RETREAT

April 7- 9th, 2024 - Doaktown, New Brunswick CANADA
