Tysson Dégis WinDev9

Jean-Claver MONTON

Cours WinDev Numéro 1

Objectifs : Connaitre les éléments de base de l'éditeur WinDev.  
Création d'un convertisseur Francs / Euro.

Pré requis : Aucun

Pour ce premier cours, nous allons créer un convertisseur franc / Euro.

Lancer WinDev 9 en double cliquant sur son icône : .

La fenêtre d'accueil apparaît (si ce n'est pas le cas, fermez le projet, quittez puis relancez WinDev) :

Cliquez sur **Créer un projet**.

La fenêtre Assistant vous indique qu'elle va vous aider en fonction de vos choix. On n'en attend pas moins d'elle.

Cliquez sur **Suivant**. Cette fenêtre va vous permettre de saisir le nom de ce nouveau projet et le lieu de stockage physique des éléments constitutifs.

Vous souhaitez préparer un BTS pour mener à bien votre projet de carrière professionnelle ? Cette lettre de motivation pour un BTS communication et industries graphiques pourrait vous convenir.

Prénom NOM  
Adresse  
Code postal - Ville  
Numéro de téléphone  
Adresse E-mail

Date, lieu,

Madame, Monsieur,

Actuellement élève en Bac pro Production graphique, je me permets de vous adresser ma **Candidature pour intégrer votre établissement**. En effet, je souhaite**fin** compléter ma formation par un BTS communication et industries graphiques.

Très polyvalent, j'ai beaucoup appris lors de ma formation théorique et des stages en entreprise qui ont jalonné ces dernières années. A ce jour, je possède de solides compétences et suis capable de définir avec précision toutes les étapes d'un projet (élaboration du cahier des charges, choix des matières, élaboration de devis...). Régulièrement au contact de professionnels confirmés, j'ai eu l'opportunité de participer à différents projets graphiques. Présent de la conception technique à la réalisation concrète de ces derniers, j'ai notamment eu comme mission de définir les éléments typographiques afin de mettre les informations en valeur tout en assurant la maintenance classique de l'équipement.

Je souhaite à présent compléter ma formation grâce à un BTS communication et industries graphiques. Prêt à m'investir pleinement dans cette nouvelle étape, je suis particulièrement intéressé par l'étude des systèmes de transmission et de transcodage.

Je reste disponible pour tout renseignement complémentaire ou pour un entretien.

En espérant que ma candidature aura retenu votre attention, veuillez agréer, Madame, Monsieur, l'expression de mes salutations distinguées.

This menu: view test results, perform tests test tests, create test from test, create test to perform editor, save new test to enable or disable automatic project from project, perform a test to create a library. Test the menu "menu" to make the engine binite is used to add new elements of this project (Windows, reports, requests, ...). F Menu Image This menu provides access to viewing options for the current item. FENU Tools This menu provides access to various control centers and external vehicles: HyperfileQL Monitoring Center for Hyperfileql Control Center User Control Center Center Central Central Management Center Integrated Messenger (WDBAL) HyperfilesQL Data Tools "Maintenance Tools Comparison. SQL Management Management Management Management Management Management Management Management - Region Backup / Restore / Cleaning Project Access Windev and Environmental Options Menu Custommenu This menu This menu is used to create a completely personal menu Allows you to manage the appearance and navigation of different open items 1.2 Toolbars Toolbars provide quick access to the main functions of the environment Various vehicles are available in WINDEV: This toolbar of standard toolbar vehicles " includes commonly used functions for create a new item, uploaded nt an existing element, save, create an executable file, ...Characterization of the quadrant that will find the poem (analysis, project, fittings, declarations, ...). This alignment ribbon in this icon overrides the ability to match outdoor alignment. It can be bought at Fenêtres and La Écateur dites Isor: The ribbon that forms this belt icon defines the component management functions (crés ©, gront, import, ...). The Source Control Ribbon in this panel icon provides the functions of the Source Director (GDS). This is displayed if the current project is a project in the GDS database. The structure of this toolbar is the functionality of images around declarations. Obviously, you can easily check the different cap in the Windev interface by checking this icon ribbon. 1.1.3. Work area The work area is the main area of the environment. Meet infantry of various ancestries (antherians, ravens, notices, code, ...). 1.1.4. Anchor shooting with connected shutters can achieve the main functions of Windev and also access all project permissions. The ANI closure is as follows: Assistant, Examples, and Components. "This component provides access to examples. Several types are possible: Fields: Additional Field Analysis: DALR Data Structure Complete Examples: Simplified Examples and All Components: Brick Software User: User Dictionary Elements (class "This component allows you to display the messages displayed in the last program test sequence". This component allows you reach the most common environmental events and elections (brutal, opening, backup, ...), and the last action "queue" allows this component Learn: information, errors and warnings about the "contextual image" of the IHM creation This component allows you to view and / or edit election leds from Dius This component catalog is a contextual image catalog This component Eyebrow fields Why"Project" in this panel lists various elements of the current project (Windows, Reports, Controls, etc.) and it is possible to manage various configurations of the project. Panel "Project Explorer" Panel This panel is used for: Analysis of procedure import, listing of elements for search classes for searching in the current project. " The "analysis" panel in this panel lists the files and their elements found during the current analysis. " Find - Replace" panel This panel is used to: search for expressions in the entire project or part of it. Replace found(s) with a different expression(s). " "Dictionary" panel This panel is used for working with WinDev dictionaries. " Task List Panel This panel is used to manage tasks that need to be completed. " View various UML diagrams (class diagram, deployment diagram, etc.) of the current project in the UML analysis panel in this panel. It also allows you to create new diagrams. " "Schedule mode" panel Displays the titles of all controls in this panel located in different planes of the current window. " The "favorites" panel in this panel shows selected elements of the project (windows, code, etc.). " The modifier panel in this panel is an overview of the main characteristics of the selected controls. selected window. This panel makes it easy to change each property. " "Browser" panel This panel offers a thumbnail project schedule and allows you to select a part to view it full size. " "Pre-View Window Position" Panel This panel is used to view and/or view the changes and/or change the position of the modified windows when they are opened (depending on the screen resolution used). " "Business Is Right" panel This panel is used to manage various business rules related to various elements of the project. " "Project Tracking Center" panel This panel allows you to monitor the progress and development times. Provides access to the project tracking center. " "Quality Control Center" panel This panel is used to manage correction and quotation requests. " Code Blocks Manager Panel This panel allows you to control frequently used code snippets. " "Interactive Scaling" panel This panel is used to display the part where the mouse pointer is currently located by scaling. "Messages" Panel This panel is used for exchanging messages between different CO-etorsVindyew's blinds can be limited, for example, the latter can be drawn to Cran. 1.1.5. Open web documents. The open documents bar shows the button for each document opened (operators, requirements, ...) by Dite. Just click on the corresponding "Button" button to bring up the first layer. 1.2 Control from the Windev environment allows Velopper to control the interactive while it's running (fire, state, requirements, code, etc.) without going down the drain and using it for the build phase. During this test you can run a Deepcor trace (cheat detected on page 123) so that no lines of code are dropped. The Windev environment also allows you to save test runs that might be dismissed as good for product quality (regular test reset means no new bugs are introduced). 1.3 Voice control is now improved using Windev, WebDev, Windev Mobile voice commands. This can be a menu option dictated by you. For example, "open file". This feature is being phased out: Windows Vista or speech recognition software (such as Dragon Naturally Speaking). Note. You can also use voice commands in Windev applications. 2 Administrators 2.1 LECTEUR DE PROJECT 2.1.1. Toolbar. Any project manager strives to have a global and concise view of the projects he manages. Anyone responsible for quality wants to know the quantity and importance of projects and keep track of their evidence. A functional controller tries to find out what the users' needs are. Veloppage is the most important part of the project. Its purpose is to directly and quickly execute the codes you use, ... the dashboard allows you to rely on all these requests. The dashboard provides different lights to view different metrics. Different lights turn from green to red when part of the project continues to interfere. 2.1.2 Projector Projector scheduling, graphic managers of project defects (Fenpets, Orients, Wishes, ...) and related sequences®. The program can be supplemented with various graphicsFleche, ellipse, ...). 2.1.3 Perso-Dossiers Project Dius allows Perso-dos-dossies to divide the project on topic and facilitate the visualization of the miniature items in a personal dose or in a personal picture. Images can be selected in the image catalog. Several personal and documentation can be opened at a time. It then appears on the left side of the work area in a miniature view where you can easily transfer your personal care to another. 2.1.4 Description The Description of the Function Project provides access to all owners assigned to the project. You can complete the tab project using the following tab: Project Reactor Project project project first management creation reactor item Description - Task Reactor Project Files Using this tab you can complete files, one or more user mode, automatic Hyperfail ESQl, automatic index options, automatic file files. You can activate the DIU data tab with this tab and select the primary database that is used for this pre -insulical database. All gifts are supported. Language tab allows you to fill in multilingual project options: Language use speeches with medical options translation files in FrameWork Windev. You can complete the tab in this tab: Used Gaboris. Personalized -style leaf path, SYSME sluts voltage and input elements template use, fenêtre D control access mode before printing, thick size. A group of cards with this card you can complete the design use by creating several: the use of the group Velopper, the use of GDS. You can turn on this tab on the map: update the components, project safety, new legacy, fenêtres and feng models synchronization. Use strict mode: This project management mode is connectedUsing the Task Management Project Tracking Center. In this mode, the programmer must be connected to the operation to change the design element. The "Programming" tab, the "Advanced" tab is used to define the following: Start reviews and requirements, unable to shouting windows, showing the "Know You" window when the application starts, user's macro code usage, window animation opening and closing, standard The animations made in control elements, the options displayed in the menu proposed using AAF (automatic application functionality) for any type of management are determined by automatic application compilation of the application compilation in this tab: Creation options for compilation compilation compilation compilation compilation compilation compilation. The compilation error associated with unknown identifiers for administrative project execution processes containing errors contains 2.1 .5 Configuration Management Management Project Configurations allow you to create several "goals" from the same project. Therefore, from the same project, such as 2nd or 3rd executable files that do not contain the same elements, the different names have 1 demo 3 or 4 component 2 network services 1 ASEBER .NET network at any time. "The project" Winds "Project Logs in the area, which does not belong to this configuration, are searched in the design table and in the" project "area. To activate or turn off the project element, all you need to do is call the element element on the design table or in the "project" area. 2.1.6. Entrepreneurship rules determine business rules accurately adjust application modes and thus save valuable money. The business rule can be simple or wide, it determines a certain procedure or type of activity. For example: Calculate VAT with your information, customer status changes, the formula for calculating the shipment, the sales commission, the discount rate, the aging rate, ... Of course, "natural" and non -binding, fully integrated into the environment and, if necessary, is available. Up toThey are in the initial specifications in complete repair measures. However, new rings will also be used. The role can be discontinued at the code stage to erase the shadow point or clarify the following. The line, finally, can be requested and provided directly with the user when he finished or request. Architects from Volopoaible, residents of users are considering a large device. The information is charming, distributed and developed by each e-Natada at any time when it is not. 2.2 Analysis of Windev, which allows you to get an unprocessed, modified, imported basic structure. The analysis includes: descriptions of files (tables) of sections (fields) of various files, graphic analysis of the relationship between cardinality and restrictions in the dictionary Dictionary Dictionary Dictionary Dictionary Dictionary Dictionary of IHM endings and code list of interested parties Gotation Rad about files 2.2.1. Requirements, new trigger, graphics for graphic analysis (cassette, functions, create seeds, drawings, drawings, ...): Analysis of this menu allows you to access Windwa administration functions. Assistant Assistant Helpers Assistant Assistant, Assistant Client/Database of the Tierce server (Oracle, SQL Server, AS/400, XML, MySQL, Informix, ODBC, OLE DB, ...) Expansion (structural voltage) Analytical analytics analytics Analyst synchronization adequate analysis of files provided by this proposalFile Management Functions (Tables). File Structures Description, Current File Section (Fields) Description, Unused Data Dictionary, Subscription Control, Intermediate File Management, Analysis Links, Auto-Missing Links, Import Auto-Link, Import, Control, External File Structures, External Databases Donate File Leveling, Analysis, Data import, SQL -Tre script, synchronization with AS/400. This form of this offer provides the main view of the oldest view and symbols used for the analysis of the program. 2.2.2 According to Menis Media, a conceptual data model is a conceptual model presented by facts and tools to be considered on the basis of data. Windev assists the designer in the brutal phase of MCD. MCD L NAP: The MCD Association has an analysis of the reactor analysis thread or CREE analysis available, which contains information on the analysis of a clear analysis of the MCD analysis.
